Attention: Mr. Greg Athron
Senior Environmental Officer

Dear Sirs:

Re: County of Simcoe Landfill Site 41
Permit To Take Water – Pumping Test Monitoring Data
File 880007.30

On behalf of the County of Simcoe, please find attached the field monitoring data for the pumping test that was conducted from March 30 to April 2, 2009. The results of the laboratory analysis of water samples will be forwarded under separate cover within 2 business days of receipt. The monitoring program was completed in conformance with Conditions 4.1 to 4.17 of Permit To Take Water No. 8876-7D4NYE.

As requested by the Ministry of the Environment, on March 30, 2009, the groundwater discharge from pumping wells PW4 and PW5 was diverted into the Stormwater Management Pond after two and a half hours of starting the test when the combined flow rate was 170.8 L/min. The discharge from that time until the completion of the test was into the Pond.

Prior to the initiation of the pumping test, the Stormwater Management Pond was filled from previous precipitation events and runoff. As such there was minor discharge from the Pond. In accordance with Conditions 4.11 and 4.13 of the Permit To Take Water, monitoring was also carried out for the Stormwater Management Pond. During the pumping test there were

two precipitation events which increased the runoff into the Pond and Swale A. As a result, the monitoring results from the Pond discharge and Swale A are a reflection of the precipitation events and groundwater discharge from PW4 and PW5.

In accordance with Condition 4.3 of the Permit To Take Water, the rock check dams were inspected by a qualified professional on April 1, 2009 and they were in good working order.

Based on the monitoring results, the groundwater discharged from PW4 and PW5 and the Stormwater Management Pond into MacDonald Creek was in compliance with the Permit To Take Water. Dissolved oxygen levels are not a concern.

We observed a small reduction in the water level at DW3. However, the owner did not report any interference with their water requirements.

We trust that this information is sufficient. If there are any questions please contact us.

Yours truly,
JAGGER HIMS LIMITED

Lara Marchetti, B.Sc.Eng.
Project Manager

LM:inc

c. Rob McCullough, County of Simcoe

- Notes**
- 1) m bTOP indicates metres below top of pipe.
 - 2) m bgl indicates metres below ground level.
 - 3) m ASL indicates metres above sea level.
 - 4) A negative value indicates the water level is above the measuring point.
 - 5) * indicates when the pump was installed.

- Notes**
- 1) m bTOP indicates metres below top of pipe.
 - 2) m bgl indicates metres below ground level.
 - 3) m ASL indicates metres above sea level.
 - 4) A negative value indicates the water level is above the measuring point.
 - 5) * indicates when the pump was installed.

- Notes**
- 1) m bTOP indicates metres below top of pipe.
 - 2) m bgl indicates metres below ground level.
 - 3) m ASL indicates metres above sea level.
 - 4) A negative value indicates the water level is above the measuring point.

- Notes**
- 1) m bTOP indicates metres below top of pipe.
 - 2) m bgl indicates metres below ground level.
 - 3) m ASL indicates metres above sea level.
 - 4) A negative value indicates the water level is above the measuring point.

- Notes**
- 1) m bTOP indicates metres below top of pipe.
 - 2) m bgl indicates metres below ground level.
 - 3) m ASL indicates metres above sea level.
 - 4) A negative value indicates the water level is above the measuring point.

GROUNDWATER LEVEL OBSERVATIONS - Hourly measurements

- Notes**
- 1) m bTOP indicates metres below top of pipe.
 - 2) m bgl indicates metres below ground level.
 - 3) m ASL indicates metres above sea level.
 - 4) A negative value indicates the water level is above the measuring point.
