PREFACE

The Ministry of Long Term Care, under the Fixing Long Term Care Act, 2021 (FLTCA) and Ontario Regulations 246/22 (O. Reg. 246/22) outlines the requirements for all Long Term Care Home licensees to have a comprehensive Emergency Response Plan to ensure the safety and security of residents, their visitors, staff, and volunteers. Licensees are responsible for ensuring compliance with the requirements of the FLTCA and its regulations.

The requirement for long-term care homes (LTCHs) to have written emergency plans for specified emergencies began in 2010, under the Long-Term Care Homes Act, 2007 (LTCHA). In response to the COVID-19 pandemic, third party reviews such as Ontario's Long-Term Care COVID-19 Commission and Auditor General's reports, sector feedback, and an increasing frequency of extreme weather, the emergency planning requirements were expanded in the FLTCA and O. Reg. 246/22. Fire safety planning continues to be required under the Ontario Fire Code.

The emergency management process includes identifying and avoiding or reducing risks, preparing for those that cannot be avoided, activating an emergency plan to respond to an emergency, and returning to normal functioning. The five components of emergency management are:

1. Prevention: actions taken to stop an emergency or disaster from occurring;
2. Mitigation: actions taken to reduce the adverse impacts of an emergency or disaster that cannot be reasonably prevented;
3. Preparedness: actions done in advance to ensure the organization is ready to manage a disaster should it arise;
4. Response: measures taken immediately before, during, or immediately after an emergency for managing the consequences;
5. Recovery: the process of restoring an affected community to a pre-disaster or higher level of functioning.

The Emergency Management Plan supports a framework of legislation, regulation and standards. These statutory documents are in place to ensure a minimum level of emergency management activities are taking place across Long Term Care Homes.

Key applicable legislation includes the:

- ✓ [Fixing Long Term Care Act 2021](#)
- ✓ [Ontario Regulations 246/22](#)
- ✓ [Retirement Home Act, 2010](#)
- ✓ [Emergency Management and Civil Protections Act, 1990](#)
- ✓ [Occupational Health and Safety Act, 1990](#)
- ✓ [Fire Protection and Prevention Act, 1997](#)

The intention of this guide is to support Emergency Response activities within the County of Simcoe's Long Term Care and Seniors Services (LTCSS) buildings. It is a compendium to the Corporate Emergency Response Plan under the auspices of the Corporate Emergency Management Department. The Emergency Management Department provides support and guidance to the LTCSS division and is responsible for the Incident Management System deployment for incidents of significance that are outside of the departmental plan.

SCOPE AND IMPLEMENTATION AUTHORITY

SCOPE OF PLAN

The Emergency Plan is used to direct staff in LTCSS, communicate resources and ensure safety in the event of a disruption of service or threat to person(s) and property.

The Emergency Plan is issued under the authority of the General Manager of Health & Emergency Services in collaboration with the Manager, Emergency Planning on behalf of The Corporation of the County of Simcoe. Any additions, deletions or revisions to this plan will be communicated to and disseminated through the General Manager of Health & Emergency Services. The Emergency Plan will be reviewed in its entirety for accuracy of information at least annually.

The Emergency Plan is in effect for the following Long Term Care Services and Seniors Services:

- Georgian Manor and Georgian Village
- Simcoe Manor and Simcoe Village
- Sunset Manor and Sunset Village
- Trillium Manor

Emergencies in LTCSS are supported by the Corporate Municipal Emergency Control Group as required.

IMPLEMENTATION

The Emergency Plan, in whole or in part, will be implemented immediately on receipt of information of imminent harm to people or property. Notice to implement could be received in the following ways:

1. Sounding of the fire alarm
2. Public address announcement of imminent risk (using established emergency codes)
3. Decision of the Charge Nurse
4. Decision of the Administrator or designate
5. Decision of the General Manager of Health & Emergency Services or designate
6. Notification from external alerts (i.e.: Tornado, External Disaster, Extreme Temperatures)

AUTHORITY DURING AN EMERGENCY

The person implementing the emergency response shall maintain responsibility for all stakeholders and all property owned or operated by The Corporation of the County of Simcoe until relieved by a more senior person within the Long Term Care and Seniors Services Division.

The person implementing the emergency plans shall work in collaboration with Emergency Services (Fire, Police, and Paramedics) to ensure all appropriate measures are taken to ensure the safety of people and property.

COMMUNICATION

During an emergency, staff communicate to key personnel internally using the P.A. System, telephones and/or messengers are also used depending on availability and need.

COMMUNICATION WITH FAMILY:

Communication is initiated and maintained with the families of all residents evacuated from or admitted to County of Simcoe homes in the event of a disaster in order to provide current, factual information regarding evacuees and admissions and to relieve anxiety and concern on the part of families. Communication is initiated after the immediate emergency has been addressed and it is safe to do so.

MEDIA COMMUNICATION/RELEASE OF INFORMATION TO PUBLIC

Staff do not communicate directly with media at any time. Media inquiries are directed to the Home Administrator, who in turn would only communicates with media as directed by the County of Simcoe Communications Department / Director of Public Affairs.

Confidentiality is to be maintained by all employees in accordance with the policy and directives of the County of Simcoe.

EMERGENCY EXERCISES AND TRAINING

County of Simcoe LTC Homes ensure that the emergency plans are tested, evaluated, updated and reviewed annually.

EXERCISE

Practice drills are conducted at least once per year on the Emergency Response Plan including fire procedures, evacuation procedures and codes.

Homes are required under ss. 268(10) of O. Reg. 246/22 to test emergency plans, including arrangements made with emergency providers. Required testing frequency is as follows:

Annually <ul style="list-style-type: none">• Outbreaks of communicable diseases, outbreaks of a disease of public health significance, epidemics, and pandemics• Fires• Situations involving a missing resident,• Loss of one or more essential services,• Medical emergencies,• Natural disasters or extreme weather events• Boil water advisories, and• Floods	Every three years: <ul style="list-style-type: none">• Community disasters (tornado, flooding)• Violent outbursts• Bomb threats• Chemical spills• Gas leaks• Evacuation
--	---

TRAINING

All new staff are instructed on the Emergency Response Plan as part of their orientation training and are given copies of their specific duties for the Emergency Response Plan including fire procedures, evacuation procedures, emergency codes and are responsible for understanding their responsibilities during an emergency. Oversight of Code Drills to the Manager of Facilities to ensure all codes are tested and reported to the Administrator

Annually			
Outbreaks of communicable diseases, outbreaks of a disease of public health significance, epidemics, and pandemics	NA	Nursing, IPAC	Report on COVID Measures, Pandemic Plan
Fires	Code Red	M&F, ESS	Observed Fire Drill (evac. 1 unit with Fire)
Situations involving a missing resident,	Code Yellow	Nursing	Actual
Loss of one or more essential services,	Code Grey	Mrg Facilities	Tabletop
Medical emergencies	Code Blue	Nursing	Drill if no actual
Natural disasters or extreme weather events	Code Orange	M&F, ESS	Tabletop
Boil water advisories, and	Code Grey	M&F, ESS	Tabletop
Floods	Code Orange	M&F, ESS	Tabletop
Community disasters	Code Orange	M&F, ESS	Drill and or tabletop
Violent outbursts	Code White	Nursing	Drill if no actual
Bomb threats	Code Black	Administration	Tabletop
Chemical spills	Code Brown	M&F, ESS	Tabletop
Gas leaks	Code Brown	M&F, ESS	Tabletop
Evacuation	Code Green	Nursing, M&F, ESS	Link with Code Red drill and tabletop for other units.

GENERAL INFORMATION

RESIDENT ACCOMODATIONS

The following content describes the physical space and resident accommodations for the four (4) locations providing residential care and services within the LTCSS department. Please refer to the Floor Plans for each building in the appendices.

GEORGIAN MANOR

Address: 101 Thompsons Road, **Block A, B, C & D**

Penetanguishene, ON L9M 0V3

Main Entrance off Thompson Road

(See Appendix A – Georgian Manor Floor Plans)

Floor/Level	Resident Home Area (RHA) Name	Private	Basic	No. of Beds
Block D, Level 1	RHA 1: Willow (secure RHA)	13	14	27
Block C, Level 1	RHA 2: Sumac	14	14	28
Block D, Level 2	RHA 3: Tamarack	14	14	28
Block C, Level 2	RHA 4: White Pine	14	14	28
Block C/D, Level 3	RHA 5: Silver Birch	12	20	32
Total	143 beds			

GEORGIAN VILLAGE COMMUNITY HOUSING

Address: 101 Thompsons Road, **Block E, F, G**

Penetanguishene, ON L9M 0V3

Main Entrance off Thompson Road

See Appendix B – Georgian Village Floor Plan

Building	Housing	# Units	Guest Suites
Block E	Georgian Terraces	40	
Block F	Georgian Suites	40	1
Block G	Georgian Residences	42	1

Unit occupancy varies depending on number of persons occupying units

SIMCOE MANOR

Address: 5988 8th Line

Beeton, ON L0G 1A0

Main entrance off County Road #1

See Appendix C – Simcoe Manor Floor Plans

Unit			
Adjala	16	2	20
Essa	16	2	20
Tosorontio	18	3	24
Innisfil	25	3	31
Nottawasaga	25	3	31
Total	126 beds		

SIMCOE VILLAGE

Address: 5988 8th Line

Beeton, ON L0G 1A0

Main entrance off County Road #1
See Appendix D – Simcoe Village Floor Plans

29 one-bedroom and 3 two-bedroom apartments. Building occupancy varies as some one-bedroom apartments are shared by couples.

SUNSET MANOR

Address: 49 Raglan Street
Collingwood, ON L9Y 4X1
Main Entrance off Raglan Street
See Appendix E – Sunset Manor Floor Plan

Unit	Private Rooms	Semi-Private Rooms	No. of Beds
Georgian 1	19	8	35
Georgian 2	19	8	35
Collingwood 2	24	4	32
South Simcoe	16	4	24
West Simcoe	16	4	24
Total	150 beds		

SUNSET VILLAGE

Address: 49 Raglan Street
Collingwood, ON L9Y 4X1
Main Entrance off Raglan Street
See Appendix F – Sunset Village Floor Plan

10 one-bedroom and 30 2-bedroom apartments. Building occupancy varies as some one-bedroom apartments are shared by couples.

TRILLIUM MANOR

Address: 12 Grace Avenue
Orillia, ON L3V 2K2
Main Entrance off Grace Avenue
See Appendix G – Trillium Manor Floor Plan

Unit	Private Rooms	Semi-Private Rooms	No. of Beds
Ramara	20	6	32
Oro-Medonte	20	6	32
Orillia	19	8	35
Severn	15	4	23
Total	122 beds		

LTCSS VEHICLE FLEET

Location			
Georgian Manor	Bus	16 ambulatory, 7 w/c, 18 max capacity	F license required
Georgian Village	Van	10 ambulatory passengers	G license required
Simcoe Manor	Van	5 ambulatory, plus driver (seats can be removed for w/c)	G license required
Simcoe Manor	Bus	6 ambulatory, 6 w/c, 17 max capacity	F license required
Sunset Manor	Bus	6 ambulatory, 6 w/c, 17 max capacity	F licence required
Trillium Manor	Bus	10 ambulatory, 5 w/c, driver, 17 max capacity	F license required

ROLES AND RESPONSIBILITIES

INCIDENT LEAD – MOST SENIOR PERSON ON SITE

Responsible for:

- Coordination and direction of response to emergency
- Responsible to ensure safety of residents, staff and visitors
- Communication with Emergency Services/Responders
- Communicating with or delegating communication to families
- Ensuring Codes are announced
- Liaise with County Emergency Management (EM), General Manager (GM) HES to activate additional resources as required

UNIT/AREA LEAD – RPN OR DESIGNATE

Responsible for:

- Ensuring safety of the residents/staff/visitors on the unit
- Updating Incident Lead on the unit status
- Following or taking action as directed by Incident Lead
- Oversight of staff activities on the unit
- Monitoring resident response to emergency and providing support, treatment as required
- Coordinating movement of residents off units for safety as required and tracking locations
- Removal of critical supplies from the units if safe to do so

STAFF RESPONDER – ALL OTHER STAFF

Responsible for:

- Respond to emergency as outlined in the Codes
- Follow direction of Unit/Incident lead
- Provide support to residents
- Notify Unit/Area lead of any resident needs or safety concerns

SAFETY OFFICER – MANAGER OF FACILITIES

Responsible for:

- Overall safety and Security of the physical premises
- Safety and Maintenance of critical systems (HVAC, communication systems)
- Oversight of the Emergency Response Plan (ERP)
- Ensure all drills are conducted as required by the Act
- Reporting and communication of ERP response to Administrator
- During an emergency, responsible for the safety of the site and staff, residents and visitors within the site.
- Code specific roles (See Emergency Codes)

EMERGENCY COMMUNICATION AND NOTIFICATION

The Emergency Notification Protocol for the LTCSS Department is as follows:

1. First call is always to 911 in emergency situations
2. RN to notify Administrator/On Call Administrator and Manager of Facilities of emergency through the on call process
1-866-267-2279
3. Administrator will notify General Manager, Health and Emergency Services and Manager, 911 and Emergency Planning
4. Emergency Management will activate County resources if required
1-705-719-7139

RESIDENT EMERGENCY CONTACT INFORMATION

The Homes' emergency contact information must be accurate in the event of an emergency situation to ensure the Home has accurate resident medical and family contact information. The contact information will always be up to date in the event of an emergency at the Home.

MASTER RESIDENT LISTS

The two evacuation boxes include a master list of all residents and room numbers but no contact information. This information is used in the event a checklist is needed to account for all residents during an evacuation.

RESIDENT'S EMERGENCY LANYARDS – CONTACT INFORMATION

When residents are admitted into the Home their medical information, family contact information and any other pertinent personal information is entered into PointClickCare. All emergency lanyards include the resident's picture once available following admission. The admission record is then printed and stored in the resident's emergency lanyard. Once completed, the resident's emergency lanyard is placed into the small emergency evacuation lanyard box located in the medication cart on the unit in which they reside.

The resident's emergency lanyard are organized alphabetically for easy access. During an emergency requiring evacuation, the RPN/designate (HSW in Retirement Home) grabs this box and works with the care team to place the resident's emergency lanyard around their neck as they are evacuated from the building.

UPDATING AND KEEPING INFORMATION CURRENT

The Administrative Assistants are responsible to keep this information current and up to date.

If any of the above lists or resident information changes (admissions, transfers or discharges) at any time, the Administrative Assistants update the master lists and/or the resident's emergency lanyard information, print and remove and/or replace the previous documents.

STAFF EMERGENCY NOTIFICATION/FAN OUT PROCEDURES

In the event of an emergency where staff need to be contacted, the primary method of communication is through SEND WORD NOW. The Nurse Manager and Administrator are the only staff who currently have

access and authority to initiate the emergency notification and access to SEND WORD NOW. As required, the Nurse Manager and Administrator (or designate) can ask for support to initiate SEND WORD NOW by contacting the Community Emergency Management Coordinator (CEMC), at:

705-719-7139

In the event that an emergency at the Home occurs, a notification will be sent out to communicate with as many staff members as quickly as possible. The end result is assembling as many people at the Home as possible in the shortest amount of time to assist with the emergency.

The Incident Lead (Administrator/delegate) has the full responsibility for making the decision to initiate the fan-out list, the number of staff to be called and the instructions to be given to them. The Incident Lead can delegate the actual act of initiating the notification protocol to another member of the team; for instance, the Director of Resident Care may notify the Incident Lead of the emergency who will direct initiation of the fan-out. See Appendix H – Send Word Now – Quick Reference Guide

In the event that SEND WORD NOW is not available, then a manual fan-out list will be utilized.

Important Reminders

- Do not discuss the emergency or situation with anyone other than the person you are attempting to contact.
- Remind staff to not make any statements to the press/media.

BACK UP PHONE SYSTEM

Emergency backup phone lines are in place at every nurse station and on the main floor at Georgian Residences. These phone lines are not connected to the phone system. Should the situation arise that the phone systems at each of the Manors fails, there is a way for incoming and outgoing phone calls to be made. This would be for emergency and scheduling purposes.

This information would need to be filtered down to staff and other outside critical parties that need to maintain contact, i.e. Doctors.

Georgian Manor/Residences	705-549-1009
Simcoe Manor	905-729-2014
Sunset Manor	705-446-9043
Trillium Manor	705-329-5827

EMERGENCY CODES

Emergency codes are used in Long Term Care and Senior Services programs to denote to staff various kinds of emergency situations. The use of codes is intended to convey essential information quickly and with a minimum of misunderstanding to appropriate staff, while minimizing stress and preventing panic among residents and visitors to the Homes. They enable a concise means of ensuring staff receive a common message, signaling the need for an urgent response without unnecessarily alerting or alarming residents or visitors.

Staff are expected to use the specific code procedures in the event of an emergency and participate in code training exercises when they occur to ensure that everyone is prepared in the event of an emergency.

CODE BLACK – BOMB THREAT/SUSPICIOUS PACKAGE

INTRODUCTION

1. A Code Black is called when there is a bomb threat. All bomb threats are treated seriously, and all staff shall respond according to the Code Black Plan.
2. The purpose of a Code Black is to respond quickly to such threats to ensure the safety of our residents, tenants, staff and visitors while minimizing disruption to the normal operations.
3. Staff shall refrain from using the word "bomb" during a code black.
4. The threat may include a pre-positioned suspicious object, possibly a bomb, or some other explosive device or other type of threat.
5. There are two basic types of threats:
 - a) **Non-specific threat** is the most common type of threat, usually with little information given other than, "there is a bomb in your building"; and
 - b) **Specific threat** provides more detail, often referencing the exact location of the device, or the time it will detonate.
6. The site search is the responsibility of emergency personnel (i.e., police); however, County of Simcoe staff may assist emergency personnel only as directed.
7. Staff shall not provide or release any information to the media about any bomb threat.
8. During a Code Black, staff will direct people to quietly leave the premises, using tact and power of suggestion in an effort to maintain control and avoid panic.

NOTIFICATION OF A BOMB THREAT

If you receive notification, whether by telephone or in writing, advising there is a bomb on the premises, you should:

1. Signal a colleague to call 911 immediately. If not possible, call 911 as soon as the call has ended.
2. Keep the caller on the line for as long as possible. **Do not hang up the telephone until they do.**
3. Remain calm and obtain as much information from the caller as possible. Ask the questions on the small, laminated cards located by each telephone, named: "Bomb Threat Questions" (See Appendix I) and record the answers, if possible, on the larger copy located in the code black folder.
4. Bomb Threat Form includes the following questions:
 - ✓ When is the bomb going to explode?
 - ✓ Where is the bomb?
 - ✓ What kind of bomb is it?
 - ✓ What does it look like?
 - ✓ Why did you place a bomb in the home?

-
- ✓ What group do you represent?
 - 5. Report the situation to the RN who will then report it to the Administrator. The RN will announce a “Code Black” and then “Code Green” for the Manor.
 - 6. Announce calmly to all visitors and staff a “Code Black” three times.
 - “Code Black (location). All visitors and staff, please turn off all cell phones and other wireless devices immediately. Thank You”*
 - “Code Black (location). All visitors and staff, please turn off all cell phones and other wireless devices immediately. Thank You”*
 - “Code Black (location). All visitors and staff, please turn off all cell phones and other wireless devices immediately. Thank You”*
 - 7. Then initiate an evacuation of the identified floor first if known, followed by the entire Manor by announcing:
 - “Code Green (location)”*
 - “Code Green (location)”*
 - “Code Green (location)”*
 - 8. As this is not a fire, the elevators may be used for the evacuation (always evacuate to a lower level but not below ground level.)
 - 9. Record all information obtained during the call on the larger copy of the form called “Telephone Bomb Threat Checklist” located in the code black folder by unit/main office telephones (See Appendix J).
 - 10. Remain available for questioning by police, as required.

SUSPICIOUS MAIL OR PACKAGES

If you find a suspicious package, you should:

- 1. Do not attempt to move or handle it; call 911 immediately and provide police with the following information:
 - ✓ Location of the object
 - ✓ Reasons suspected
 - ✓ Description of the object
 - ✓ Any other useful information
 - ✓ Evacuation intentions
- 2. Do not open the package. If you suspect a chemical or biological substance, cover the package with a plastic sheet.
- 3. Isolate the package
- 4. Evacuate the room
- 5. If a bomb is suspected leave doors and windows open to minimize blast effects
- 6. If a chemical or biological hazard is suspected, close all doors and windows to minimize dispersion of the substance
- 7. If you touched a package that possibly contains a harmful substance and the substance transferred onto your clothes:
 - ✓ Wash your hands well
 - ✓ Shower with your clothes on then undress and seal your clothes in a plastic bag
 - ✓ Shower again and dress in fresh clothing
- 8. Report the situation to the RN who will then report it to the Administrator. The RN will announce a “Code Black” and then “Code Green” for the Manor.
- 9. Announce calmly to all visitors and staff a “Code Black” three times.
 - “Code Black (location). All visitors and staff, please turn off all cell phones and other wireless devices immediately. Thank You”*
 - “Code Black (location). All visitors and staff, please turn off all cell phones and other wireless devices immediately. Thank You”*
 - “Code Black (location). All visitors and staff, please turn off all cell phones and other wireless devices immediately. Thank You”*
- 10. Then initiate an evacuation of the identified floor first if known, followed by the entire Manor by announcing:

"Code Green (location)"

"Code Green (location)"

"Code Green (location)"

11. As this is not a fire, the elevators may be used for the evacuation (always evacuate to a lower level but not below ground level.)

INDICATORS OF SUSPICIOUS MAIL

Staff should familiarize themselves with the types of packages usually received by mail. Any package that arrives that appears out of the ordinary should be treated as suspicious mail that could contain a bomb or a harmful chemical, biological, radioactive or nuclear substance. If you are suspicious that a letter or package may contain a harmful substance, you may refuse to accept it.

Examples of suspicious packages include:

- ✓ Excessive weight for the size of the package
- ✓ Rigid or lopsided packaging
- ✓ Small holes with or without protruding wires, string or metal foil
- ✓ Package feels springy or seems to contain metal
- ✓ Oily or greasy stains or discolouration
- ✓ Unusual odour
- ✓ Excessive tape or string used to close the package
- ✓ Excessive postage
- ✓ Addressed to title only or the wrong title with a person's name
- ✓ Hand-written or poorly typed address
- ✓ Indecipherable or no return address
- ✓ Unusual or unexpected point of origin
- ✓ Misspelling of common words
- ✓ Restrictive marking e.g., Confidential, Personal, or Only to be Opened By

SITE SEARCH

1. A complete building search will be conducted and controlled by police.
2. Police will manage the search with the assistance of County of Simcoe LTC home staff, as they cannot readily identify items or objects that are foreign or out of place.
3. If the bomb is not found immediately, a full site search may be initiated and conducted by Police with the assistance of County of Simcoe Manor/LTC staff.
4. Areas which are accessible to the public require special attention during a search.
5. During a site search, staff are looking for something that does not belong, or is out of the ordinary or out of place.

SITE SEARCH MEETING

1. Under police direction, a site search meeting may take place in a designated area. Police will assume responsibility for conducting the site search meeting.
2. The Administrator and the RN will work together with the Police to complete the site search. The Police Department will ultimately be in charge and County of Simcoe LTC Home employees will follow their lead and instructions.
3. The Administrator /designate or RN brings copies of the Search Reports to the site search meeting. Each search team completes a "Code Black Search Report" of their area assigned if requested by the Police and may include searches of both the interior and exterior of the building with extra effort being given to all public areas.
4. Remember, if a suspicious object is located **DO NOT TOUCH IT; INFORM THE POLICE!**

REOCCUPATION OF THE BUILDING

Re-occupation of the building is a decision that will be made by the police. The RN will guide the reoccupation of staff and residents back into the home once police give the “all clear”.

DOCUMENTATION

1. The Administrator ensures that a detailed report is completed for each Code Black and that staff meetings are held in response to improvements or areas requiring policy and procedure changes.
2. The Administrator ensures that all appropriate agencies are informed of the Code Black incident (e.g., Home and Community Care, Ministry of Health).
3. A copy of the report and all associated documentation will be maintained in the home.

CODE BLUE

The goal is to provide high quality of care for residents/staff in the timeliest manner, while ensuring appropriate protection of the LTCSS staff. Cardiopulmonary resuscitation (CPR) is considered a high-risk aerosol generating medical procedure (AGMP). There is a risk of generating potentially infectious particles into the air associated in performing CPR which will require additional precautions to be taken. The Code Blue procedure below reflects the most recent recommendations from Heart & Stroke Foundation.

It is important to note that a Do Not Resuscitate (DNR) order is applicable in a cardiac arrest, but does not preempt the application of CPR in reversible conditions such as choking. Choking is a reversible condition and Heimlich procedure and CPR should be initiated until paramedics arrive.

In the event that a Code Blue occurs in the home involving a resident, the following actions are to take place:

If a resident has a **WITNESSED** cardiac arrest, the registered staff on the affected location are to be contacted immediately.

1. The first registered staff member arriving on the scene becomes the lead.
2. The lead will assess the resident for a pulse and respirations
3. A surgical/procedure mask should be placed over the resident/staff's face immediately to prevent any fluid spread while assessing for a pulse and breathing.
4. The 2nd responder will review the Advanced Directive on file for the resident.
5. If the Advanced Directive requires resuscitation, the registered staff member with the resident will commence chest compressions.
6. The 2nd responder will retrieve the AED and Code Blue Response kit located in the resident dining room on each unit and deliver it to the room and then call 911.
7. When the AED arrives, the lead nurse will apply it and follow the prompts. Remove the surgical mask from the resident and provide BVM ventilations as per the BLS Health Care Provider CPR training. If a third responder is available, they will assist the first responder with CPR and ventilation.
8. The lead nurse will continue resuscitation efforts until the paramedics arrive.
9. On arrival of paramedics, control of the code will be handed off to them.
10. The lead nurse will remain to provide a report. If paramedics terminate resuscitation and death is expected, they will ask to contact the primary care provider to pronounce death. If death is not expected, police will be contacted and the coroner notified.
11. The next of kin/POA will be notified and funeral home contacted. (See Delegated Acts Policy – Nurse Pronouncement of Death procedure).
12. Following a Code Blue, the nurse completes the Code Blue Report Form, and gives a completed copy to the ADRC/DRC and a copy to the Administrator.

If the victim is a staff member or essential visitor

Lead nurse will cover the victims face with a surgical/procedure mask, perform hands only CPR (chest compressions)
The 2nd responder will retrieve the AED and the responder kit and call 911

CODE BROWN – HAZARDOUS SPILL

Any spill or leak of a chemical is treated as being a potential hazardous material incident until the chemical can be identified.

INTRODUCTION

As part of the W.H.M.I.S. Program, County of Simcoe LTC Homes provides for the handling of hazardous spills.

Material Safety Data Sheets (M.S.D.S.) include information on the safe and proper handling of a spill for each chemical used in each department within the Manor.

It is the responsibility of each Supervisor to ensure:

- a) that all chemicals are stored safely,
- b) that there is a current MSDS Sheet for every chemical used in the department,
- c) that every chemical is clearly identified, especially if it has been transferred from its original container.
- d) that staff are properly trained on the safe use of all chemicals, and
- e) that staff are trained on how to report a spill.
- f) that the least noxious chemical is chosen where ever possible.

NOTIFICATION OF A CHEMICAL SPILL

All County of Simcoe LTCSS home staff is responsible for immediately reporting a chemical or mercury spill to either a Supervisor or RN in charge.

The RN or person first finding the spill announces three times over the P.A. system that there is a **“Code Brown”** and informs staff of the location of the spill and requests staff cooperation in avoiding this area until the spill is contained.

EMERGENCY PROCEDURES FOR ALL STAFF

1. Immediately evacuate all persons from the danger area.
2. Determine the name of the spilled or leaking chemical from the label on the container.
3. Determine if the chemical or material is one of the following:
 - Explosive material
 - Flammable gas
 - Poisonous gas
 - Corrosive gas
 - Flammable or combustible liquid
 - Flammable solid
 - Oxidizer
 - Poisonous or infectious substance
 - Reactive material or
 - Corrosive material

-
4. If the type of spilled/leaking substance cannot be determined, then it must be assumed to be the most dangerous substance stored in the facility.
 5. In the event someone is negatively affected First Aid based on M.S.D.S. may be provided and Emergency Response (911) is called.
 6. Provide emergency personnel with name of the chemical or material involved when known.
 7. Eliminate ignition sources.
 8. Prevent all non-emergency persons from entering the spill area.
 9. Follow the instructions of the RN.
-

EMERGENCY PROCEDURES FOR MAINTENANCE/ESS STAFF, ADMINISTRATOR AND/OR RN

1. Establish:
 - ✓ Health hazard
 - ✓ Fire hazard
 - ✓ Hazard to the environment
 - ✓ Procedure for containing the spill/leak
 - ✓ Procedure for disposing of the spilled chemical/leak
2. Notify Fire Department (Call 911), if you think the hazard cannot be dealt with by maintenance or utility staff.
3. With WHMIS information determine the need to evacuate the building or part of the building.
4. If it is determined that an evacuation or partial evacuation is necessary, meet with Department Heads and then initiate the evacuation procedure for fire emergencies.
5. If the material is flammable, eliminate ignition sources.
6. Prevent all non-emergency persons from entering the spill area.
7. Call ESS/Maintenance.
8. Ensure appropriate PPE and follow proper procedures for containment, neutralization and cleanup of chemical spills.
9. If any substance has entered, or is believed to have entered, a drain or water course, notify the following:
 - ✓ The Ministry of the Environment
 - ✓ The Local Spills Coordinator
 - ✓ The Local Public Works Department
10. No matter how small, all spills are to be documented. A record is to be kept of:
 - ✓ the name of the spilled material
 - ✓ the quantity involved
 - ✓ the names of persons involved in the spill and clean-up
 - ✓ the names of anyone requiring medical treatment
 - ✓ Any outside agencies or contractors that were involved
 - ✓ How the spill material was disposed of
11. If there is an injury, then the MOL is notified (and a Form 7 completed).

EMERGENCY PROCEDURES FOR ESS/MAINTENANCE/UTILITY STAFF

1. Contain and clean up the spill by:
 - ✓ Ensure you are wearing the appropriate protective clothing and equipment to safely clean up the spill.
 - ✓ Stop any on-going leak
 - ✓ Protect drains in the immediate area by covering them with rubber sewer drain covers, or surrounding them with spill socks.

-
- ✓ Scrape up the bulk of the material and put it in an appropriate container.
 - ✓ Soak up the remainder of the material using an absorbent substance (e.g. sawdust, absorbent pads). This material must be compatible with the spilled material.
 - ✓ Place the waste material in an appropriate container.
 - ✓ Follow disposal instructions as established with the hazardous waste removal contractor.
 - ✓ Clean the spill/leak area with an appropriate cleaning solution.
 - ✓ Contact the hazardous waste removal contractor to have the waste removed.

CHEMICAL STORAGE

Chemicals are stored by individual departments in their own storage facilities, in a location and containers appropriate for the chemicals being stored.

SPILL CONTROL SUPPLIES

Chemicals

All protective equipment and materials needed to address any spill within a County of Simcoe LTC Home is located in the area most needed and identified as “chemical spill clean-up kit”.

Mercury

There is currently no hazardous mercury items in the buildings. Mercury Spill kits are available to buy but not required at this time.

Other Spill Control Supplies (gasoline, motor oil, hydraulic oil)

Separate spill kit containers containing all necessary protective equipment and supplies is available located in the mechanical pump rooms for the purposes of containing and cleanup of “other” type spills such as motor oil, gasoline and hydraulic oil.

Disposal

The Environmental Services Supervisor is responsible for arranging the correct disposal through hired service contractors for all chemical spills in accordance with required disposal standards and municipal by-laws.

Restock of Supplies:

Upon completion of any clean up, the Maintenance or Utility Staff who performed the clean-up informs the Environmental Services Supervisor who immediately replaces all spill clean-up supplies, including absorbent material and protective clothing.

INCIDENT INVESTIGATION

The Manager/Supervisor (s), Environmental Services Supervisor, and the Administrator meet as soon as possible after the incident to complete the Hazardous Spill Incident Report Form (Appendix K). The form is reviewed and recommendations made to prevent further incidents of hazardous spills.

The Department Supervisor(s) implement all action plans identified, according to the recommendations of this investigation analysis.

CODE GREEN

INTRODUCTION

Code Green is used to evacuate the residents from the home either partially or totally. A requirement to enact Code Green develops from either internal or external conditions. Depending on the degree of warning and time available the evacuation may be considered either precautionary or emergency:

Precautionary Evacuations

1. A precautionary evacuation is a move from an area that is currently safe but is threatened by an approaching emergency. An evacuation is necessary to prevent injury or loss of life.
2. Precautionary evacuations usually occur as a result of an external event such as a natural disaster (e.g. flood, chemical leak, or prolonged major mechanical or electrical failure).
3. For precautionary evacuations there is sufficient time (hours, days) to plan a controlled and safe evacuation of residents of the home.

Emergency Evacuations

1. Emergency evacuations are precipitated by a clear and immediate threat.
2. In emergency evacuations, an immediate and swift response is required.

EXTERNAL RELOCATION

When a full evacuation of the Home is necessary, the following actions must be taken:

1. The IMS (Incident Management System) will be immediately initiated.
2. Each department/unit is to follow procedures already in place to shut down equipment, close windows and area. After areas have been properly secured, staff are to take direction from the RN/Operations Chief (typically DRC/designate) under the IMS.

If it is deemed necessary to relocate residents and staff to another facility:

1. A predetermined location will be arranged as per established/signed reciprocal agreements.
2. Inside each RHA medication cart, is a small emergency box containing an emergency evacuation tag for every resident. The Administrative Assistant is responsible for ensuring that each of these emergency boxes have up to date tags for every current resident in the home – at time of admission and to remove tags when residents no longer resident in the home.
3. Resident identification tags will include:
 - Name
 - Photo
 - Diagnosis
 - Allergies
 - Emergency contact information (next of kin/POA's)
 - Date of birth
 - And any other important information
4. Prior to evacuation, and to check attendance, staff place the resident's evacuation identification tag on them.
5. If possible, staff will ensure that the following items are also retrieved from the Home safely:
 - ✓ All resident aids (hearing, mobility, dentures)
 - ✓ Chart cart
 - ✓ Applicable Medications/Medication Cart
 - ✓ Necessary Medical supplies
 - ✓ ESB (Emergency Supply Box)-box
6. If it is deemed unsafe to re-enter the building to obtain the above supplies, continue the evacuation and transportation to external facility.

TRANSPORTATION

1. In an emergency evacuation, an assessment of the transportation requirements will be conducted to include:
 - a. Internal Resource Capacity (all internal resources)
 - b. Specific transportation requirements
 - c. External vehicles required
2. The Administrator/Director of Seniors Services in consultation with the General Manager will identify to the County CEMC (Community Emergency Management Coordinator) that additional transportation requirements are required.
3. The County CEMC in consultation with other community partners will coordinate additional transportation needs.

NOTIFICATION OF RESIDENTS' FAMILIES:

Notifying the next of kin will be done after all residents/staff have been safely re-located to the evacuation location.

STAFF DUTIES DURING CODE GREEN

ALL STAFF

1. It is the responsibility of all staff to ensure the safety of residents at all times.
2. Upon hearing the **"Code Green - Prepare to Evacuate"** announcement, nursing and other staff will congregate all residents in one central location close to an exit on their designated floors.
3. Work with the RPN to place the emergency evacuation tag on each resident prior to evacuation and ensure all residents are accounted for.

REGISTERED NURSE (RN)

1. Announce the first stage of evacuation **"Code Green - Prepare to Evacuate"** and announce the procedure for evacuation.
2. Ensure that staff are responding to the announcement properly and assign additional staff to assist where necessary.
3. Announce the **"Code Green - Evacuate"** announcement to staff giving the details of the area to be evacuated and routes to be used.
4. Ensure that in the event that residents are evacuated to a location other than the agreed upon relocation site, that an RPN or designate and ambulance supervisors are jointly logging each resident being loaded for transfer using Code Green Relocation Tracking Form at the front door (located in the emergency kit).
5. Check to ensure that all rooms being evacuated and marked accordingly.
6. Implementation of SEND WORD NOW/ fan-out will be done in consultation with the Home manager/On call manager.
7. Liaise with arriving Emergency Services and coordinate with them throughout the evacuation.

REGISTERED PRACTICAL NURSE (RPNs)

1. RPN or designate logs each resident using an Evacuation Transfer Record Forms prior to evacuation.
2. Ensure that the medication carts and EMARS for all residents residing on their respective floor are taken to the relocation site. If not able to take the medication carts, contact Medical Pharmacies to inform them of the evacuation, and they will arrange medications and EMARS for each resident to be delivered to the relocation site.
3. Direct the staff response for their area.
4. Determine the order of residents to be evacuated.
5. Determine if there is any essential equipment or records required for the continuing care of the residents elsewhere and to contact the Administrator/Director SS concerning their removal.
6. Secure the area in a safe manner prior to leaving.

ADMINISTRATIVE ASSISTANT

1. Ensure that the Resident Emergency Evacuation Lanyard is available for each resident and located in the evacuation box in the RHA medication carts.
2. Ensure that the Code Green Relocation Tracking Forms are up to date and located in the two Emergency Kits.
3. Ensure staff emergency telephone lists are current and up to date.
4. Audit the 2 Emergency Kits to ensure they are stocked as required.

SUPERVISORS

1. Ensure adequate stock of emergency supplies.
2. Keep supplier telephone lists current.
3. Take charge of their respective department in an emergency or disaster situation.

DRC / ADRC

1. Implement SEND WORD NOW if required.
2. Work with Procurement Department to update suppliers and pharmacy commitment letters annually.

ADMINISTRATOR/DIRECTOR OF SENIORS SERVICES

1. Take charge in an emergency and implement the IMS as required.
2. Ensure reciprocal agreements are in place.

DOCUMENTATION

Documentation of resident relocation during a Code Green evacuation will be done using the Code Green Relocation form (Appendix L)

CODE GREY

INTRODUCTION

Code Grey is the disruption or loss of critical services in the building including:

- Elevators
- Phones
- Computer network or software
- Water
- HVAC Heating/Cooling system
- Electricity (e.g. power outage)

FOR ALL CODE GREY INCIDENTS

1. Continued resident safety and care and staff safety is a priority.
2. Immediately notify your supervisor and senior manager on-site.
3. The on-site senior manager is required to notify the LTCSS Administrator, Maintenance Manager and Environmental Services Supervisor.
4. The LTCSS Administrator or senior manager will notify other LTCSS Managers from the home as needed, depending on the service which has failed.
5. The LTCSS Administrator or senior manager will also notify and activate support as needed, depending on the service which has failed:
 - ✓ General Manager, Health and Emergency Services
 - ✓ Director, Procurement, Fleet & Property
 - ✓ Community Emergency Management Coordinator: 705-719-7139 (24/7)
 - ✓ For critical IT/ or phone system loss after hours IT Support: 705-915-1311
6. The Maintenance Manager and/or Environmental Services Supervisor will take immediate steps to have the disrupted system repaired and mitigate harm or damage by making repairs on-site and/or notifying the appropriate repair service or utilities provider.

-
7. Shut off all non-essential electrical equipment to avoid power surges and to reduce electrical ignition sources
 8. If it is safe to do so, remain on your floor and wait for instructions from the Charge Nurse
 9. If there is a door on your floor that is normally on mag lock, monitor it so all residents do not have access

EMERGENCY PROCEDURES FOR MANAGEMENT

1. Assign maintenance staff to ensure the generators are operating fully.
2. Assign maintenance staff to ensure that the fuel supply is monitored and to arrange for delivery before fuel supply is depleted.
3. Contact the local hydro utility to inform them of the situation.

EMERGENCY PROCEDURES FOR NURSING

1. Ensure that all electronic medical equipment is provided with power through the emergency power system using the red electric sockets (generator powered).
2. Ensure electrical specialty mattresses used on residents beds are either powered into a generator socket or replaced with a standard mattress

EMERGENCY PROCEDURES FOR MAINTENANCE STAFF

1. After power outages and/or fire alarms all Mag-Locks on exit doors must be reset.
2. Ensure that the generators are operating properly.
3. Monitor fuel supply and notify your supervisor if fuel supply is running low.

FIRE ALARM SYSTEM

1. The system has two sources of power, Normal and Emergency generator.
2. When the normal source of power fails, the emergency power source will take over automatically (power outages).

EMERGENCY LIGHTING

1. When the normal power system fails auxiliary lighting is provided by the diesel generator.
2. Dark red switches and outlets are on auxiliary power.

ELEVATOR FAILURE

1. If someone is trapped in the elevator, notify supervisor or the RN who will notify Maintenance to contact the repair company and determine an estimated response time.
2. Do not attempt to force open the elevator doors; wait for repair service.
3. If any person is in distress, call the Fire Department for assistance.

PHONE OR COMPUTER SYSTEM FAILURE

1. Contact IT to report. Weekdays during business hours call extension 1311.
2. The IT After Hours number (705-915-1311) is for loss of critical IT phone systems. It is monitored weeknights: 4:30-10:00 p.m. & weekends 9:00 a.m.-9:00 p.m. (Outside of these hours contact the Director of IT, IT Manager of Infrastructure & Operations by cell phone or the CEMC 24/7 line: 705-719-7139.)

BOIL WATER OR DRINKING WATER EMERGENCY

The local Public Health Unit issues advisories when there are conditions that indicate drinking water may not be safe for consumption. These advisory notices are to help prevent possible water-borne illness.

The following advisories may be issued depending on the type of contamination in the drinking water:

- boil water advisory
- do not drink
- do not use advisory

Information on Water Advisories Provided by the Simcoe Muskoka District Health Unit

1. Boil Water Advisory (BWA)

- Issued when are issued when conditions or concerns may adversely affect the quality or safety of your water supply. A BWA is put in place to protect you from harmful organisms such as bacteria or parasites that may be in the water.
 - The extent of restrictions on water use depends on the situation and the reason for issuing a boil water advisory. Boiling of the water is required as a short-term solution to rectify the problem found in the water.
2. If a BWA has been issued, it is important that you properly boil or treat all the water in your home.
 3. During a BWA, it is not safe to use water directly from your tap. Only boiled, treated water or an alternate water source (i.e. bottled water) should be used for drinking, preparing food, making beverages or ice cubes, washing foods, or brushing your teeth. Pets can get some of the same illnesses as people so they should be given bottled water or boiled water that has been cooled.
 4. To boil water:
 - Heat the water until bubbles come from the bottom of the pot to the top.
 - Once the water reaches a rolling boil, let it boil for one minute.
 - Turn off the heat source and let the water cool.
 - Pour the water into a clean container with a cover for storage.
 5. Do Not Drink or Do Not Use drinking water advisories are issued during situations when boiling the water or disinfecting the water will NOT get rid of the problem with the water supply. If there is a chemical contamination in the water, boiling the water may actually INCREASE the concentration of chemical in the water. It is not safe to drink this water. Example: drinking water sample results are in exceedance of the Ontario Drinking Water Quality Standards for lead.
 6. A Do Not Drink advisory is issued when an alternate water source such as bottled water should be used for consuming, food preparation, preparing infant formula, gargling, brushing teeth, washing dishes, making ice and beverages, and for pets to drink. However, the water may still be used for bathing, showering, and performing hand hygiene.
 7. An example of when a Do Not Drink advisory is issued includes when drinking water sample results are in exceedance of the Ontario Drinking Water Quality Standards for lead.
 8. A Do Not Use advisory is issued when an alternate water source such as bottled water should be used for bathing, showering, hand hygiene, consumption, food preparation, preparing infant formula, gargling, brushing teeth, making ice and beverages, washing dishes, for pets to drink, and washing fruits and vegetables. A Do Not Use drinking water advisory is issued when drinking water becomes contaminated with chemicals.

EMERGENCY PROCEDURES FOR INCIDENT LEAD (I.E. ADMINISTRATOR/RN)

1. Notify all staff to stop using water for drinking, cleaning and food preparation based on the type of advisory.
2. Direct the Manager of Maintenance and Facilities to procure a supply of potable water or contact the Community Emergency Management Coordinator (705-719-7129) to coordinate the delivery of water through the Director of Procurement, Fleet & Property (Logistics)
3. The County of Simcoe Emergency Response Plan contains a Resource Directory which contains suppliers who can deliver of potable water.
4. Identify where water-use can be reduced in order to adjust to the limited supply of water available

AFTER A BOIL WATER ADVISORY IS LIFTED

Following a drinking water advisory, it is important to flush water systems in the facility to ensure there is no ongoing risk of contamination. Contact the Simcoe Muskoka District Health Unit (SMDHU) for specific directions on restoring the system based on the nature of the advisory at: 705-721-7520

System restoration steps may include:

- Running cold water faucets for a minimum of 10 (ten) minutes before using the water.
- Running drinking fountains for 10 (ten) minutes before using the water.
- Run water softeners through a regeneration cycle.
- Reverse Osmosis (RO) units: Replace pre-filters and follow the manufacturer's instructions.
- Replace other water filters, as they are disposable and may be contaminated. This applies especially to carbon filters and others that are near the end of their life.
- Flush, clean, and sanitize appliances with water line connections (e.g. fridges with water and ice dispensers) following the manufacturer's instructions.
- Drain and refill hot water heaters if set below 45°C (113°F). Normal setting is 60°C (140°F).
- Drain and flush all ice-making machines and soda fountain machines.
- Dispose of any ice made during the advisory.
- Note: run water taps to ensure the water is not cloudy.

[SMDHU Website](#)

For all other Code Grey disruptions, managers and supervisors will direct staff on actions to take.

CODE ORANGE

INTRODUCTION

Code Orange refers to external disasters in the community where the Home may be required to accommodate victims. County of Simcoe Long Term Care and Seniors Services have formal reciprocal relocation plans in place with various other homes/facilities. In the event that any of these homes/facilities need to be evacuated, they may send their residents/patients/clients to our homes for care/housing in an emergency situation. The Registered Nursing Staff and PSW's from these homes would accompany and stay with their residents at any of the County of Simcoe homes where possible.

It is important all County of Simcoe staff be familiar with the procedure for the reception of evacuees in an emergency. The County of Simcoe homes will provide immediate care and shelter to those impacted.

County Council has delegated signing authority to the General Manager of Health and Emergency Services to sign reciprocal agreements on behalf of the Health and Emergency Services division.

NOTIFICATION

Notification of a Code Orange will be provided by an external Authority or the Community Emergency Management Coordinator or alternate. The Manager, 911 and Emergency Planning must be advised of the situation in the event the information comes from outside the organization.

On notification, the number of individuals being transferred to the homes will be identified. After hours and on weekends, the call will go directly to the RN. The RN will update the Administrator or designate of the situation and the expected number of individuals to be provided care and shelter. Where possible the evacuating organization will provide any resources required to support those individuals who will arriving at the home. Where that is not possible the home will need to seek. A review would be required prior to approval of accepting individuals.

Criteria includes but is not limited to:

- FRI Screening (most current version from Public Health)
- Infection control requirement
- Number of individuals
- Physical status
- Term (length of stay)
- Internal capacities
- Staffing requirements
- Supplies & agreements
- Transportation needs

Approval is made by Administrator in conjunction with General Manager and Emergency Planning Department. There would be coordination with the County Emergency Management Coordinator to facilitate additional support services as needed (ie. Red Cross).

ANNOUNCEMENT

1. The RN or delegate makes a Code-Orange announcement over the PA system.
2. Prior to making a code orange announcement over the P.A. System, the RN staff calls the fire monitoring company to notify them that the system will show trouble.
3. The RN makes the Code-Orange announcement over the PA System as required, stating very clearly **“Code Orange, Prepare for the reception of patients”**. This message is repeated 3 times.

ADMITTING EVACUEES

1. The reception of persons seeking temporary refuge takes place in the main lobby through the front doors. All evacuees are admitted through the front entrance. A staff member is assigned to the front door to meet them at this location and keep a running tally of the evacuees.
2. All evacuees are admitted using the FRI Screening Form or other required screening tools in place.

-
3. Identibands are attached to the wrist of evacuees where there it is identified as a need depending on the situation.
 4. If the Kardex or a medical chart has arrived from the sending agency, this can be used to verify information.
 5. The original admission form, plus the Card and/or medical chart accompanies the evacuee to the admitting area they are assigned within the home.
 6. A copy of the admission form will be kept for handling all inquiries concerning evacuees on completion of the admitting procedure.
 7. Evacuees will be escorted to the admitting area and oriented to their surroundings.
 8. If Nursing staff from the sending agency are available, they are encouraged to assist in the admitting procedure and accompany evacuees to the admitting area.
 9. Once the capacity of the home has been reached, the staff member informs the Administrator.
 10. Beverages are made available by Dietary staff whenever possible.
 11. Staff refer all medical information requests to the DRC/Administrator.
 12. In the event that a large number of people are admitted at one time, the largest area with the Manor will be used as the holding area until the people are properly registered and then escorted to their admitting area.

STAFF ROLES

There are written duties that shall be carried out in the event of an external disaster to provide direction for County of Simcoe LTC Home staff to make appropriate provisions for the care of residents received. The Administrator will provide oversight of activities and make necessary notifications to the MLTC, CEMC and General Manager

DIETARY STAFF

1. The Supervisor of Dietary Services organizes to accommodate the influx of people.
2. Existing inventories of fresh and frozen food supplies are assessed and additional supplies acquired as soon as possible.

ENVIRONMENTAL SERVICES AND MAINTENANCE STAFF

1. Making up beds for the temporary residents.
2. Providing sufficient linens necessary for distribution.
3. Provide beds/mattresses as required.
4. Move unnecessary furniture out of the admitting area rooms and move these items to a non-resident storage area.

PROGRAM AND SUPPORT SERVICES STAFF

1. Activation Staff support the home where required.

REGISTERED NURSE

1. The RN accepts the call from the sending facility, the IMS Coordinator and confirms the number of patients we are able to receive.
2. The RN contacts the DRC and/or Administrator for authorization to initiate Code Orange.
3. The RN informs the Medical Director of the Home of the situation.

DISCHARGE PLANNING

There is a coordinated and organized discharge of evacuees, to the care of next-of-kin, legally authorized representatives, and other facilities. This is coordinated with other community agencies such as the Local Integrated Health Network (LHIN). Records are maintained as to the location/person to whom evacuee is discharged.

INCURRED COSTS

All costs and requirements to be documented utilizing the Additional Cost Tracking Form (Appendix M)

CODE ORANGE - EARTHQUAKES

Although other parts of the world experience more earthquakes than Ontario, historically earthquakes with a magnitude in excess of 5 have been experienced.

EMERGENCY PROCEDURES FOR ALL STAFF

1. Stay calm and do not run outdoors.
2. Take shelter under tables, beds, desks, in shower stall or anything that will offer protection against flying glass and debris.
3. Stay away from windows, skylights and large overhead light fixtures.
4. Protect your face and head with your arms.
5. Stay under cover until shaking stops.
6. Be prepared for aftershocks.
7. If instructed to evacuate, follow fire evacuation procedures. Watch for falling debris or electrical wires upon leaving the building
8. If fire occurs, sound the alarm.

EMERGENCY PROCEDURES FOR MANAGEMENT

1. Warn residents to expect the fire alarms and sprinklers to go off during an earthquake.
2. No one should leave the building.
3. Seek cover under a heavy desk, table, etc. or stand in inside doorway away from windows.
4. DO NOT USE ELEVATORS.
5. If outside when earthquake strikes, stay in clear area if possible away from trees, buildings, etc.
6. Do not enter building after quake as it could collapse.
7. After the shaking has stopped, decide with other supervisors present as to the requirement to evacuate the building.
8. If evacuating outside, ensure everyone is moved away from the building to prevent injury from fallen debris.
9. If necessary, arrange transport of residents to another health care facility.
10. Put out small fires quickly if this can be done without endangering personnel.
11. Clean up flammable liquid spills as soon as possible.
12. Expect aftershocks.
13. Do not re-enter the facility until emergency personnel (i.e. Fire Department) determines that the building is structurally safe

CODE ORANGE – SEVERE STORMS

Severe weather conditions such as tornadoes, hurricanes, hail, blizzards, ice storms and heavy rain are monitored by Environment Canada 24 hours a day, 7 days a week. If a severe storm is on the horizon, the weather service issues a “Weather Watch” and then if more severe a “Weather Warning”.

“Weather Watch”: broad category issued up to six hours in advance to alert public for a specified forecast region of Ontario that there is a high potential for dangerous thunderstorm weather, which may be accompanied by winds, hail and/or a tornado.

“Weather Warning”: dangerous winds, severe thunderstorm with possibility of tornado imminent which could cause injury to life and property (i.e. severe thunder storm is in progress or expected to occur within two hours). If Environment Canada had confirmation of a Tornado, they would issue a "TORNADO WARNING".

EMERGENCY PROCEDURES FOR ALL STAFF

1. Stay calm and do not run outdoors.
2. Move residents to the corridor or to an inside room (away from the outer walls of the building).
3. Keep at least 15 feet away from windows to avoid flying glass.
4. Keep away from skylights and large overhead light fixtures.
5. Take shelter under beds, desks, in shower stalls or such that offers protection against flying glass and debris.
6. Protect your face and head with your arms.
7. Stay under cover until the severe weather condition has subsided.
8. Identify persons with injuries and provide medical assistance as appropriate.

EMERGENCY PROCEDURES FOR ADMINISTRATOR/CHARGE NURSE

If you receive information from weather forecasters that a severe weather condition is imminent, you will make the decision to:

1. Close the building to non-essential personnel.
2. Notify Day Program and other facility users to move everyone in their area away from windows and outside doors.
3. Close doors to all rooms with outside walls. Stay low and protect head with pillow or blanket.
4. Provide safe accommodations for staff that are on duty and cannot leave.
5. If the building is affected by a severe weather condition:
 - a. Identify persons with injuries and provide medical assistance.
 - b. Check exit stair wells to ensure they are safe and available to use in the event of an evacuation.

CODE ORANGE – BIOLOGICAL OR CHEMICAL THREAT

HAZMAT

Characteristics of a Biological Agent:

1. Generally in liquid or powder form.
2. No odor or colour.
3. Symptoms may be delayed for days.
4. Inhalation most likely and effective route but could also be through food/water contamination or skin absorption.
5. Many likely agents are heavier than air and tend to stay close to the ground.
6. Most will break down fairly rapidly when exposed to sun, diluted with water, or dissipated in high winds.

Characteristics of a Chemical Agent:

-
1. Generally in liquid form and often aerosolized (fine mist).
 2. Has a unique odor and colour. Common odors for chemical agents include bitter almonds, peach kernels, fresh mown hay, mustard, onion, garlic, geraniums or green grass.
 3. Most result in immediate symptoms or are delayed for a few hours at most.
 4. Inhalation is the most likely route but could also be through food/water contamination or skin absorption.
 5. Many likely agents are heavier than air and tend to stay close to the ground.
 6. Some will break down fairly rapidly when exposed to sun, diluted with water, or dissipated in high winds.
-

WARNING SIGNS THAT A BIOLOGICAL/CHEMICAL INCIDENT HAS OCCURRED

1. Droplets of oily film on surfaces.
 2. Unusual dead or dying animals in the area.
 3. Unusual liquid sprays or vapors.
 4. Unexplained odors.
 5. Unusual or unauthorized spraying in the area.
 6. Multiple victims displaying symptoms of nausea, difficulty breathing, convulsions, disorientation, or patterns of illness inconsistent with natural disease.
 7. Low-lying clouds or fog unrelated to weather, clouds of dust, suspended or coloured particles.
 8. People dressed unusually (long-sleeved shirts or overcoats in the summertime) or wearing protective breathing protection particularly where large numbers of people tend to congregate, such as the auditorium.
-

EMERGENCY PROCEDURES FOR ALL STAFF

1. Protect your breathing airway. Distance yourself from the contamination source, cover your mouth and nose with a handkerchief, clothing, etc.
 2. Evacuate as many residents from the contaminated area as possible if this can be done without becoming a victim yourself.
 3. Persons without proper training and equipment do not attempt to rescue anyone who is overcome by the biological/chemical agent. They will only become another victim.
 4. Notify the Site Administrator or designated Charge Nurse immediately.
 5. If you have been in contact with an agent, immediately wash it off with soap and water. Do not use bleach.
 6. Inform charge nurse if you may have been in contact with a biological/chemical agent.
 7. Seal off your area by closing doors and windows.
 8. Maintenance staff to shut down the HVAC equipment.
 9. Follow directions of charge nurse.
-

EMERGENCY PROCEDURES FOR MANAGEMENT

1. If you believe that a biological/chemical threat has occurred, immediately ensure that all residents and everyone else are relocated to an area away from the release.
 2. Call 911 immediately and inform them of the nature of the incident.
 3. Assign staff to secure entrance to the facility. No one other than emergency personnel or facility staff is to be allowed into the building until the incident is resolved.
 4. Everyone should be relocated to the adjacent fire compartment.
 5. If it is suspected that the agent can spread to the next fire compartment, then everyone is to be moved upwards to an interior room on a higher floor. (Many agents are heavier than air)
 6. When everyone has been evacuated the area is sealed off as much as possible by closing doors and having maintenance shut down the HVAC equipment.
-

-
7. Record the names of everyone in the area who may have been in contact with the agent for appropriate follow-up treatment.
 8. Quarantine those who may have been in contact with the agent, so as not to affect anyone else in the facility.
 9. Ensure that anyone who has been in contact with the agent washes it off with soap and water immediately.

“SHELTER IN PLACE” PROCEDURES

If it is not possible or advisable to evacuate the building implement the following:

1. Move residents, staff and everyone else upwards to an interior room on a higher floor since many agents are heavier than air or to an adjacent fire compartment is not practical.
2. Seal off the affected area.
3. Seal the building or room so contaminants cannot enter.
4. Close all windows and doors.
5. Have maintenance staff turn off all air exchanges. See Section C-4 (Building Resources Controls Locations). Then have the maintenance staff seal gaps under doorways, windows, and other building openings.
6. Monitor radio or television stations for further updates and remain in the shelter until authorities indicate it is safe to come out.

EXTERNAL CHEMICAL SPILLS

1. Any external chemical spills (i.e. from highway accident, gas leaks, fire, etc.) falls under the jurisdiction of the local Fire Department.
2. Immediate action is required to prevent the entrance of contaminated external air into the facility.
3. Notify the Site Administrator or designated Charge Nurse to determine if the Fire Department should be contacted immediately. If they are unable to clean up the spill themselves, they have a firm that they can contact to do this.

EMERGENCY PROCEDURES FOR ADMINISTRATOR/CHARGE NURSE

1. Inform residents and staff that they are not to exit the facility. (PA announcement)
2. Account for all residents and staff. If they are outside, have them return indoors and instruct them to stay inside.
3. Close all doors and windows.
4. To exclude outside air, in lounges, activation rooms, dining rooms, family rooms and other common areas switch "occupied switch" to "off" position.
5. Have maintenance shut down all fresh air intake fans and exhaust fans.
6. Designate one entrance and exit to the facility. Have staff member monitor to minimize unnecessary access/egress.
7. Lock all other exits/entrances.
8. Confer with Fire Department, Ministry and other Authorities to determine the need to relocate.

CODE PURPLE

Code Purple is used in situations where a staff member, resident and/or visitor are forcibly confined or held against his/her will, with the threat of a weapon or threat of violence

FOR STAFF WHO ARE INVOLVED IN A HOSTAGE-TAKING SITUATION:

1. REMAIN CALM.
2. Pay close attention to everything you see and hear.
3. Cooperate and follow the instructions of your captor(s).
4. Speak when spoken to.
5. DO NOT try to escape unless your life is in immediate danger and you have no other option.
6. If anyone needs special medication (e.g. insulin, nitroglycerin) or medical attention, inform your captor(s)
7. If you believe a rescue is taking place, or you hear noise or shooting, stay down. Keep your hands on your head. Do not make any sudden movements. Follow all instructions from the police.

FOR STAFF WHO BECOME AWARE OF A HOSTAGE-TAKING SITUATION

1. If it is safe to do so, attempt to isolate the hostage taking area. Evacuate all staff, residents and visitors not involved in the situation from the immediate vicinity of the hostage taking to a safe place and prevent people from entering the area. Engage other staff to assist as needed.
2. Call 911 to activate police response and provide information above.
3. Maintain a safe distance from the area to ensure you do not become a hostage as well.
4. Attempt to obtain the following information:
 - ✓ Location of hostage taker(s) and hostage(s)
 - ✓ Injury to any individual(s)
 - ✓ Emotional state of hostage taker(s) and hostage(s)
 - ✓ Demand(s) made by the hostage taker(s)
 - ✓ If weapon(s) are involved and type of weapon(s) if known
5. Notify a supervisor or manager
6. Announce a Code Purple and location three times over the PA System
7. Do not attempt to disarm or threaten the hostage taker.

FOR STAFF IN OTHER AREAS OF THE BUILDING

1. Follow the instructions of management until police arrive and then follow police direction
2. Take steps to protect resident safety

RN/DRC/ADMINISTRATOR

1. Go to the LTCSS Home Command Centre or alternate Command Centre if it is safe and retrieve the emergency kit box
2. Assume command of the situation
3. Ensure 911 has been called
4. Ensure that a Code Purple has been announced
5. Meet, or designate a staff member, to meet police at a safe location when they arrive
6. Take steps to ensure safety of residents, visitors and staff outside of the hostage taking area. Initiate a Code Green to move people to safer areas of the building or out of the building if necessary.
7. Take steps to prevent people from entering the building
8. Notify County General Manager of Health and Emergency Services and other LTCSS supervisory staff who are not on-site
9. Maintain an incident log of the actions taken
10. Follow police instructions when they arrive on-scene

CODE RED

A Code Red is called when there is a fire or smoke from an unknown origin. All County of Simcoe Homes have partnerships with their local fire departments to test and action a Code Red emergency. Due to the nature of the residents in our Homes, LTC Homes are designated as Vulnerable Occupancy dwellings.

Each Home will have an approved fire plan developed in consultation with their local fire department that is maintained by the Manager of Maintenance and Facilities.

ANNUAL BUILDING INSPECTIONS

1. Registration – All COS Homes are registered with Fire Services as a “Vulnerable Occupancy” (effective 2014).
2. The Facilities Manager contacts the local Fire Services annually (by September if they have not been contacted by the local Fire Services) to invite them to complete a fire safety inspection of the long term care home building. Based on the results of this inspection, the Facilities Manager undertakes to have all deficiencies repaired and rectified as soon as possible.
3. The Facilities Manager provides written confirmation to their local Fire Services once all deficiencies have been rectified and invites them to re-inspect for compliance.
4. Records and documentation regarding the inspection and fire drill are maintained by the Facilities Manager

FIRE DRILLS

Fire safety training is part of probationary as well as annual staff training. The purpose of doing fire drills is to simulate a fire situation to enable all staff and residents to know what to do in the event of a real fire.

1. In keeping with Ontario Fire Code and Vulnerable Occupancy legislated requirements, all County of Simcoe Long Term Care Homes practice an annual fire drill and inspection conducted by the local Fire Department.
2. Once a year: A horizontal or vertical evacuation beyond two fire separations will be undertaken by the Long Term Care Homes.
3. Once every three years: An external evacuation will be undertaken by the Long Term Care Homes.
4. Regular Fire Drills – The Facilities Manager or delegate (generally an ESS/maintenance staff person) ensures three fire drills are performed each month on all three shifts, as required by Ontario Regulation 213/07 of the Fire Code and the Ministry of Health and Long Term Care.
5. Fire Drills are held on all three shifts monthly (i.e. days, evenings, and night shifts) and staff attendance is documented.
6. Fire drills on evenings and nights may be silent.
7. Each fire drill is conducted and documented by the Facilities Manager (or designate) by use of the Fire Drill Report Form. (Appendix N)
8. The 3 monthly fire drills are not reported to the Fire Department, but are documented and recorded internally by Environmental Services.
9. The designated maintenance staff running the fire drill notifies the fire monitoring company, 15 minutes before the fire drill is conducted, and provides them with information about the approximate length of time the drill will require.
10. After the fire monitoring company is notified, the designated person activates a smoke detector or alarm pull station in the chosen area. For training/drill exercises, a flashing light may also be used to serve as the fire for silent drills. This light is placed in the chosen room/area.
11. A bright orange FIRE Captain vest is worn by the person in Charge (i.e. Administrator or ESS Supervisor) / Fire Captain / Charge Nurse / PSW etc) corresponding to the home's Fire Safety Plan and staff fire assignments. Staff follow the directions given to them by the person wearing the orange FIRE Captain vest until the Fire Department arrives, at which time the Fire Department takes charge. Change to the home will follow the approved fire plan.
12. When the bells sound, all staff initiate the Code Red Procedures
13. At the conclusion of the fire drill, designated staff reset the fire panel, and maglocks and call the fire monitoring company to inform them the drill is now over.
14. All door holders and mag-locks are reset by staff.

-
15. At the conclusion of the fire drill, the fire drill report (Appendix N) is completed, noting any deficiencies noted and communicated to the Facilities Manager and Administrator
-

APPROVED STAFFING LEVELS

In accordance with Vulnerable Occupancy Legislation (Ontario Regulation 150/13), all County of Simcoe homes maintain a minimum staffing level approved by the local Fire Department as per their annual Fire Department observed drill. The following are the approved staffing levels at each of the four homes:

HOME	RN	RPN	PSW	LAUNDRY	OTHER: SPECIFY	TOTAL
SUNSET MANOR	1	1	7	2	0	11
TRILLIUM MANOR	1	1	5	1	0	8
GEORGIAN MANOR	1	1	6	1	0	9
SIMCOE MANOR	1	1	5	1	0	8
GEORGIAN RESIDENCES					1 HSW 1 Security	2

**** The above staffing levels do not change unless approved by the Fire Department****

The County of Simcoe Scheduling Department reports daily on the end of day report to ensure that minimum staffing levels on night shifts are flagged as per Fire Marshall's expectation.

All County of Simcoe homes PRACTICE the fire drill scenario and supervisory duties prior to fire service observations to ensure time requirements are obtained with minimum staffing levels.

CODE RED PROCEDURE

Treat every alarm as if it is real

If you discover a fire, you are the Fire Coordinator until relieved by a senior staff member, and will follow the actions outlined in the acronym REACT.

1. Remove persons from immediate danger if it is safe for you to do so
2. Enclose the fire – close windows and doors
3. Activate the fire alarm system – use the nearest pull station
4. Call 9 911 (if a real fire) and announce the location using PA system if it hasn't already been done
5. For Code Red AP announcement: Calmly and clearly identify the location of the fire, repeating it 3 times.
i.e.: "Code Red (Home Area), Room #" 3 times
6. Treat all fires as a serious occurrence

IF THE FIRE IS NOT IN YOUR AREA

1. Listen to the PA announcement for the location
2. Remain calm
3. Close all the windows and doors
4. Follow your department specific duties
5. Turn off the oxygen cylinders until given the all clear
6. Account for staff, residents and volunteers
7. Reassure residents

-
8. If assigned, meet arriving fire department and provide them with any necessary information (i.e.: location of the fire)
 9. The RPN in your area will identify a staff member to go assist
 10. Await the All Clear announcement before returning to your normal duties
 11. If you are sent to assist
 - a. Proceed to the fire doors outside of the fire area to assist as directed by the fire coordinator unless otherwise directed in the Home's fire plan
 - b. Do not take any fire extinguishers from another unit to the area of the fire
 12. If you hear the fire alarm, remember:
 - a. Check your work area to make sure there is no fire in your immediate area
 - b. All staff are to return to their work area upon hearing the alarm, even if on breaks or not on duty
 - c. Elevators are not to be used at any time during the fire situation
 - d. You have specific responsibilities according to your department

EVACUATION OF THE FIRE ZONE

The goal must be to evacuate all endangered occupants from the fire area and confine the fire as quickly as possible

1. Upon direction from the fire department or the fire coordinator, residents are to be moved horizontally (sideways) to a staging area beyond the fire doors
2. If safe for you to do so, evacuate the room of the fire origin first
3. Next evacuate the rooms on either side of the room of fire origin and the room directly across the hall
4. When a room has been evacuated, open the magnetic evacuation tag found on the door and attach it to the doorframe as you close the door. Proper evacuation tag use can be a matter of life or death for residents
 - a. **If the room is empty:** The tag is in the "open position" and will show the reflective side. This indicates the room has been checked and evacuated
 - b. **If the room is occupied:** The tag remains in the "closed position" indicating to others that the room is occupied and in need of evacuation.
 - c. **Note:** Georgian Manor/Village has a REMAR System, a circular disc on the door, that is turned to identify vacant or occupied.
5. Visitors, volunteers and residents capable of self-evacuating should be instructed to leave the fire area on their own or with some assistance. Residents are to remain in the staging area.
6. Visitors could provide assistance if give suitable instructions
7. Evacuate ambulatory residents next. They should be moved in a group whenever possible
8. Residents and others in wheelchairs are moved next
9. Other non-ambulatory residents are then moved when adequate manpower is available
10. If you are unable to evacuate a bedridden resident, close the door, but do not open the magnetic evacuation tag
11. Reassure residents that are left in their rooms that they will be evacuated as soon as possible
12. Report to the fire coordinator which residents/rooms that need to be evacuated with assistance
13. The fire coordinator will report to the fire department residents that still require evacuation

CODE SILVER

In an active attacker situation, personal safety is important. Staff who are hurt or injured will not be able to assist others. Take steps to protect residents, visitors and other staff if you are able; however, staff should protect their own safety first.

EMERGENCY PROCEDURES FOR ALL STAFF

1. There are three actions to take in the following order: **RUN, HIDE, DEFEND**.
2. If you can run or hide, **do not** attempt to engage the assailant. This includes verbal or physical attempts to de-escalate the situation.
3. If it is safe to do so, lock or secure immediate areas where you are to help protect others; however do not do this if it endangers your personal safety.

RUN

If you have the opportunity, run away from the attacker. Don't let indecision slow you down. If the attacker stands between you and an exit, move quickly to safety and find a place to hide. **Call 9-1-1 from a safe location to activate police response.**

- ✓ if you have the chance, run to safety
- ✓ leave your belongings behind
- ✓ help others stay out of harm's way
- ✓ call 9-1-1 from a safe location
- ✓ Announce "**Code Silver**" and **location 3 times** over the paging system

HIDE

If you cannot run to safety, make it difficult for the attacker to see, hear or find you. Move quickly but remain calm. If you are in a group, scatter so that you don't make an easy target.

- ✓ lock doors and barricade yourself
- ✓ turn off any lights
- ✓ turn off phone sounds and vibrations. Do not turn off your phone
- ✓ be prepared to run or fight if you are found
- ✓ do not attempt to return to your place of work

DEFEND

Despite attempts to run and hide, you may find yourself face to face with the attacker. Defending yourself may be your last resort, but it may also afford you the chance to run or hide.

- ✓ be prepared to defend yourself
- ✓ team up with others
- ✓ identify defensive skills and tools
- ✓ your actions before police arrive may save your life

When Police Arrive

Remain calm and follow instructions. Put down any items in your hands that could be mistaken for a weapon and avoid making quick movements.

Provide police with information you have about:

- ✓ The location of the attacker
- ✓ The number of attackers, if there is more than one
- ✓ A physical description of the attacker
- ✓ The number and type of weapons being used by the attacker
- ✓ Potential victims and their location

CODE WHITE

County of Simcoe LTC Homes have established guidelines to follow in the event of a potential or actual occurrence of a security threat or aggression by another person. The other person could be a stranger (a person unknown to staff), visitor, family member, volunteer, co-worker, resident/client, and/or relative of a worker etc.

In an attempt to defuse the situation, Gentle Persuasive Approach (GPA) or other de-escalation strategies may be implemented.

In the event a staff member worker, resident or visitor feels threatened or at risk of harm by another person as listed above, and is unable to defuse the situation, the following actions shall be taken:

First and foremost, try to remain calm!

Depending on the seriousness of the threat, staff have several options to consider:

1. If possible, signal a second person to assist.
2. If appropriate, ask the person to stop the behavior which is causing you concern and/or ask the person to leave.
3. If in immediate danger obtain assistance:
 - ✓ verbally call out
 - ✓ use portable phone
 - ✓ pull the emergency nurse call pull-cord
 - ✓ use a screecher
 - ✓ activate closest fire alarm pull station
4. If resistance is met, and you feel threatened, ask a staff member to initiate a Code White.

CODE WHITE PROCEDURE

1. Once notified by a staff of a security concern and their request for a Code White, staff immediately make an announcement on the Public Address (P.A) system stating very clearly: **"Code White", and identify the EXACT location of the individual in need of assistance.** i.e.: "Code White, 3rd floor south dining room." Repeat the Code White announcement three times.
2. Once the Code White announcement is made, all available staff stop what they are doing and immediately report to the area identified ensuring that at least one staff member remains on the unaffected RHA's.
3. Additional staff assist by removing uninvolved individuals to a safe area, and follow the directions of registered staff.
4. In an emergency **any** staff member can call 911. Give location of the Manor, describe emergency and provide other information as requested
5. Once situation is resolved, advise the Administrator/delegate of situation as soon as possible.
6. The County of Simcoe's **Violence in The Workplace** policy and any other required procedures are to be implemented and followed.

INTRUSIVE THREAT FROM OUTSIDE THE HOME

A staff member who becomes aware of an intrusion by an armed person, a violent act (shooting, stabbing or physical assault) or hostage taking incident takes the following actions:

1. **Do not use the P.A. System.**
2. Keep calm and do nothing that will attract the intruder's attention.
3. Immediately evacuate as many people as possible from the area.
4. Prevent other people from entering the area.

-
5. Call 911. Give them the details: how many people have been injured, how many intruders, what weapons they have.
 6. If you are not able to leave the area, barricade yourself in the most secure room available.
 7. Notify RN/Managers/Supervisors of the situation.
 8. Ensure that any injured victims receive medical treatment, if this can be provided without putting anyone else in danger.
 9. Provide police with any information they require, including floor plans of the area in question, a list of staff and residents in the building.
 10. Follow instructions from the RN and then the police once they arrive.
 11. Assign someone to notify other areas of the home in person regarding the situation.

CODE YELLOW

An established procedure for search and rescue will be implemented if a resident is missing or has not returned to the Home as expected (according to past patterns or communication). There is a process in place to identify all residents who are potential wanderers and at risk for elopement. All residents at risk are identified in their Plan of Care and chart.

EMERGENCY PROCEDURE FOR ALL STAFF

Ensure complete documentation of all details in the resident's record. Nursing Management are required to complete a Critical Incident Report and file it with the Ministry of Health if resident is missing for more than 3 hours

LEVEL 1: INTERNAL SEARCH

1. When a resident is thought to be missing, the RPN of the Resident Home Area (RHA)/ Retirement Home (Home) shall be notified
2. The RPN will ascertain the following:
 - ✓ Resident has not gone off the RHA/Home accompanied (appointment, hairdresser, activities with family)
 - ✓ Resident has not been signed out on an LOA
3. If resident is confirmed absent through above process, the LTC RPN will page the resident to return to the RHA/Home.
4. Staff shall search the resident's usual areas. If not located in any of those areas, the resident will be considered missing.
5. Notify the RN on duty immediately.
6. The RN (or designate) shall page "**CODE YELLOW, (resident's name) please return to (RHA/Home).**" This will be repeated 3 times. A photo of the resident and clothing description will then be given to the RN. Check with staff to see if there have been any unexplained door alarms.
7. The RN will notify the DRC and Administrator in LTC homes/RPN will notify the supervisor at Georgian Residences.
8. Following a "**CODE YELLOW**" announcement, staff in other RHAs and departments shall check their areas.
9. The RN will be located at the main nursing unit and assign staff a search area, using the provided internal floor plans.
10. The RPN will act as Search Coordinator(s) and will report back to the RN in charge.
11. Staff shall do the following:
 - ✓ Conduct a systematic search of the assigned areas, including anywhere a resident might be able to hide.
 - ✓ Initial each section of the floor plan as searched; sign and date the floor plan when completed. Add the time and a staff signature to the search document once completed.

-
12. Once their areas are checked, all available staff will report to the RPN Search Coordinators on the affected RHA/Home of the missing resident.
 13. The RPN Search Coordinator will then update the RN in charge.

LEVEL 2: EXTERNAL SEARCH (ON-SITE)

1. The RN will assign staff a search area, using the provided external search area maps of the immediate grounds. Conduct a thorough search of facility grounds.
2. The substitute decision maker or family member shall be notified.
3. Nursing coverage in the LTC Homes/Retirement Home must be sustained to ensure the safety of the other residents, with a minimum of one staff member at each RHA.

LEVEL 3: EXTERNAL SEARCH (COMMUNITY)

1. If resident is still not located, the RN (or designate) will **call police (OPP) at 911**.
2. Home staff are not to leave the Home to conduct external searches into the community
3. Ensure that a detailed description of the resident, a picture, and point last scene (PLS) are available for the police when they attend the facility. Provide any other information that might be helpful.
4. The Administrator/Director of Seniors Services will notify the HES GM and County CEMC at 705-719-7139.
5. Home staff will follow the direction of the Police and be prepared to respond or provide additional information as required
6. RN will maintain regular communication with the family of the missing resident

DOCUMENTATION FOR ALL EMERGENCY CODES

1. At the completion of any code, actual or drill, an Emergency Code Debriefing form (Appendix O) will be completed and used to document the code exercise to provide evaluation feedback on the code called
2. The Emergency Code Debriefing forms will identify any concerns with any code, actual or drill, with suggested mitigation strategies identified and actioned;
3. The Facilities Manager will retain the copies of the Emergency Code Debriefing form and provide regular updates at the Home Senior Management meetings
4. In the moment corrections or questions arising from staff will be included in the Debriefing form.
5. Opportunities for re-education to staff is explored when knowledge gaps are identified.

RECIPROCAL AGREEMENTS

Every three years the County of Simcoe updates their Emergency Planning Information and negotiates reciprocal agreements with local area homes. County Council has delegated signing authority to the General Manager of Health and Emergency Services. (Appendix P – List of Current Reciprocal Agreements)

REVIEW COUNTY OF SIMCOE HOME'S RECIPROCAL AGREEMENT

The Homes Administrative Assistants review the Homes' reciprocal agreements to ensure that it is up-to-date:

- ✓ Update managers names
- ✓ Ensure that description of potential Residents that can be accepted to the home
- ✓ Complete form ensuring that all are up-to-date

-
- ✓ Ensure supplies that would be made available are current
 - ✓ Review the updated Home Reciprocal agreement with the Administrator
 - ✓ Attach a map to the home and save as PDF in the folder
 - ✓ Send to Research and Project Coordinator for General Manager sign Develop

UPDATE PARTNERSHIP RECIPROCAL AGREEMENTS WITH HOME'S IN YOUR AREA

1. Email homes using the standard email and attach
 - ✓ A blank agreement
 - ✓ County of Simcoe Home completed and signed PDF agreement
2. Follow up with Homes as appropriate
3. File received Reciprocal agreements in A24
4. Update home's tracking form

WHEN PARTNERSHIPS ARE REQUESTED

1. Respond with the signed County of Simcoe Home Reciprocal Agreement form and ask for one in return
2. Attach a blank agreement or receive their form

SUPPLIES AND LOGISTICS

According to the FLTCHA and RHRA, all County of Simcoe LTCSS Homes will ensure that resources, supplies and equipment vital for the emergency response are set aside and readily available at the home.

PHARMACY AND MEDICATION SUPPLIES

Medisystems Pharmacy Care Home Disaster Plan (CL-P20)

1. In the event of a disaster, fire or other forced evacuation at the home, Pharmacy will work closely with the home to provide the following in a timely manner:
 - ✓ Replacement and dispensing of all required medications
 - ✓ Delivery of required medication to alternative locations
 - ✓ Delivery and Printing of MAR Sheets and/or Prescriber's Medication Review
 - ✓ Provide ongoing refills to the alternate location for the duration of the evacuation
2. Contact the pharmacy immediately and inform them of the transfer of residents to any temporary facilities. Please call the following people in this order:
 - a. Medisystems Pharmacy: (705)722-7440
 - b. After Hours Pharmacist: 1-888-630-6334
3. Communicate which resident(s) require replacement medications and delivery location. Pharmacy will prepare replacement medications in blister cards, vials, or multi-dose packages for the required length of time.
4. Medications will be prepared and delivered to the temporary facilities once prepared and verified. Any pharmacy supplies, equipment, and documentation records (e.g. MAR sheets) will also be delivered at that time.

In the event the home receives residents evacuated from another home or the community:

1. Request that all medications and MAR Sheets & TAR Sheets accompany the resident if possible.
2. MediSystem would require the following information in order to fill and dispense medications to these residents:

- ✓ Resident's first and last name as it appears on their Health Card.
 - ✓ Health Card Number and Version Code
 - ✓ Allergy information, if known
 - ✓ List of all current medications
 - ✓ Name, address, telephone number of prescribing doctor OR
 - ✓ Name and telephone number of pharmacy supplying current medications
3. Pharmacy will make arrangements to dispense medications to these residents in blister cards, vials, or multi-dose packages for the required length of time.

EMERGENCY SUPPLIES

Each Department maintains an adequate 3 day supply of "stock items" that would be required in the event of a building evacuation or lack of ability to evacuate or ability to get supplies due to a larger community type disaster. If a code green is called and the building is to be evacuated, these items are brought to the Emergency Disaster site by designated staff.

EMERGENCY SUPPLIES - NURSING

If a code green or evacuation is called, and whenever possible, all medication carts are transported to the evacuation site. In the event that this is not possible, Medical Pharmacy is immediately contacted, and they will deliver a supply of medication and EMARS for each resident to the relocation site(s) as soon as possible.

EMERGENCY KITS

Each LTC Home will stock and maintain 2 emergency kits to be used in the event of any type of emergency and the Retirement Home will maintain 1 emergency kit. There is an emergency kit checklist that is to be audited monthly by Seat Two (2) Administrative Assistant

Emergency Kit Locations				
Sunset	Simcoe	Georgian	Georgian Residences	Trillium
Physiotherapy	Boardroom	Auditorium	Clean Utility Room	Hillcrest Hall
Georgian 1 Report Room	Maintenance Shop	Tamarack Nursing Station		Oro-Medonte RHA

EMERGENCY KIT CONTENTS

Each time the "Emergency kit" is opened, the contents must be reassessed to ensure it is fully stocked at all times, **READY FOR EMERGENCIES**. Supplies are not to be removed unless for use in an emergency.

Contents of Kit						
Gloves (box)						
Hand sanitizer (one bottle)						

VESTS for Incident Management System (IMS) – with ROLES clearly identified						
Fluorescent vests (orange) – extra for staff as needed (3)						
2 Crank Flashlights						
Stethoscope and Blood Pressure cuff						
Masks (box)						
Mouth-to-mouth mask						
1 pair of Scissors						
Foil warming Blankets (one per resident)						
Basic first aid supplies (gauze and tape), non-stick dressing (telpha)						
1 box - Pens						
1 - Pad of Paper						
1 Crank Radio (located in RN office)						
2 extension cords						
10 identification bands (code orange)						
List of Staff Contact Numbers (fan out)						
List of residents, by RHA and unit						
Code Green Relocation Tracking Forms						
Emergency Kit Contents Audit Form						
Emergency Transfer Forms						
Floor Plans						
Date and Initial →						

Note: Resident Lanyards for each RHA are in the nursing station medication carts in a small emergency box and is maintained by Administrative staff.

POTABLE WATER SUPPLIES

Potable water will be provided through suppliers and are listed in the Resources Annex of the County of Simcoe Corporate Emergency Response Plan

In the event that potable water is required, the Administrator/designate will contact Emergency Management if supplies are required.

FOOD

Dietary staff prepares for a disaster by following a pre-planned 3-day menu, and ensures an adequate supply of those food items required to prepare the food listed on the 3-day menu plan.

(Refer to Appendices Q, R, S – Emergency Menu Order Guide, Recipes and Nutritional Spreadsheets)

RECORD OF CONSULTATIONS

Consultations with external partners is imperative in the review of the County of Simcoe LTCSS Emergency Plan. The table below lists the consultations on the development of the plan and subsequent reviews

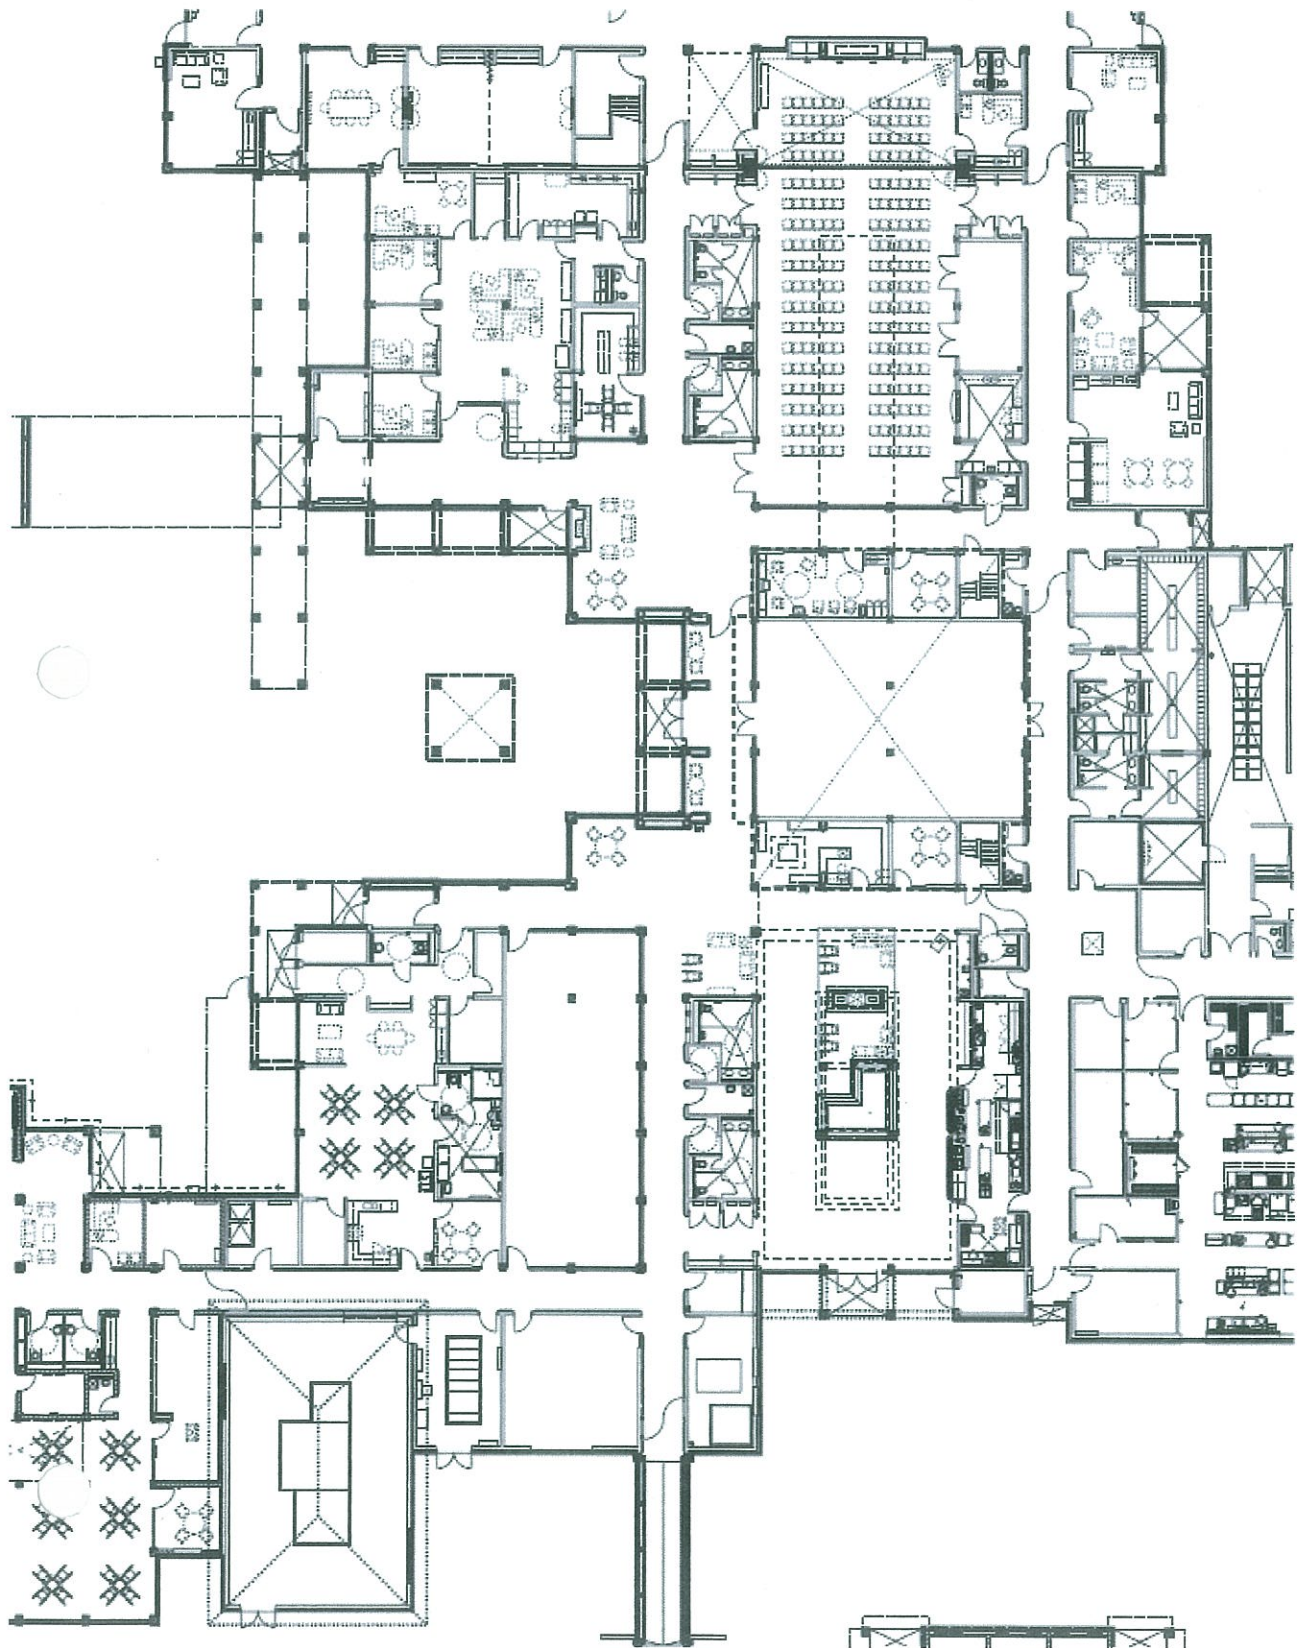

Date	Partner Consultation	Recommendations	Date Plan revised
2022/05/13	P. Browne, Inspector Tactics & Rescue/ Emergency Response Commander, OPP	Coordination with police during Code Yellow	2022/05/16
022/05/18	Mgrs. Maintenance & Facilities & ESS Supervisors	Planning for annual exercises and tabletop drills	022/05/18
2022/06/28	St. Sgt. M. Perry, ERT Team, Coordinator, OPP	Coordination with police during Code Silver, Purple	2022/06/28

- No matter how many of the selected groups a recipient belongs to, they will be listed only once.

- Recipients may default to automatically being selected or deselected according to account defaults for composing alerts.
- Select or deselect records as necessary; a *Recipients Selected* tally is located in the upper right-hand corner.
- Use the **Search** button (or **Simple Search**) and **Advanced Search** functionality to filter recipients.
- Add an alert recipient who is not a member of the group(s) selected via the **Add Recipients** button.
- View individual contact data to confirm that the recipient is the one intended.
- Optionally set location and add GIS shape via the **Map Location** button.

Search Show All

Select All Filtered | Deselect All Filtered

Contact Name	Unique ID	Time Zone	Actions

2 Recipients Selected | 40071 Recipients Filtered | 40088 Recipients Total

- Sort Contact Name and Unique ID by using the up/down arrows in the column header.

Select the **Go Back**, **Cancel** and **Next** buttons on the sticky navigation bar at any time during this step.

Step 4: Alert Composition

Compose the alert following *Alert Composition Best Practices*.

Message Content tab:

Home - Send Message

Send Message

Message Content CAPTCHA Features Sender Information

SMS Message Templates: SMS default

Subject: Send Word Now Alert

Message:

Customize Message by Device:

Select labels: All Voice Text By Label

Send Message Save as Scenario Save and Send Save as Scheduled

- Change alert subject, if necessary.
- Enter text for the alert in the **Message** field, either single body (default) or customized by device. Click on the loudspeaker icon to hear a preview of how the Text-to-Speech (TTS) engine will read the text.
- Select device types and labels to which the alert will be delivered. Default is **All** Labels. Other options are **Voice** only, **Text** only (email/SMS/FAX, etc.), or **By Label** custom delivery to recipient device addresses (voice or text addresses).

Customize Message by Device – Provides a list of all device types available based on account configuration.

If left unchecked, the same message body text is sent to all device labels selected for the alert.

When checked, separate **Message** fields display for each device type selected, for content customization.

Customize Message by Device: Select All | Deselect All Hide details

☒ Email ☐ Express ☒ Voice
☒ Alertus ☒ Blackberry Pin ☒ Cisco Phone
☒ Desktop Alerting ☒ Fax ☒ Instant Messaging
☒ Pager ☒ SMS

Select labels: All Voice Text By Label
Select All | Deselect All | Text Only | Voice Only
☐ Voice - Cell Phone ☐ Voice - Work Phone ☐ Text - SMS

Note: only labels associated with the selected devices will be included in the message

Select labels (All) – Alert is sent to all available recipient device addresses (contact points) associated with the selected device types.

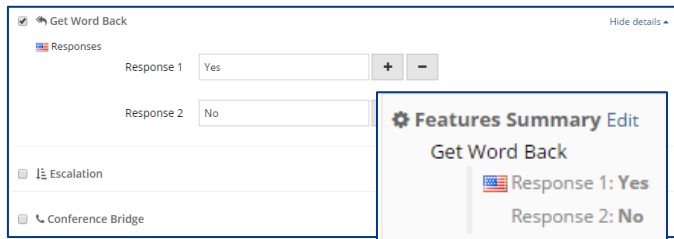

Select labels (By Label) – Provides a list of all device labels (naming of associated contact points) available for the selected recipients (e.g., Cell Phone, Office Phone, Fax, SMS Text, TTY Device, Work Email, etc.).

- Select the **Spell Check** button.
- Click on the globe icon for alert languages, when Multi-Language Alerts (MLA) is enabled.

Spell check Go Back Cancel

Features tab:

- Use additional Features by Account for the alert by selecting the corresponding checkbox. Features vary according to account configuration. Once selected, feature details display.

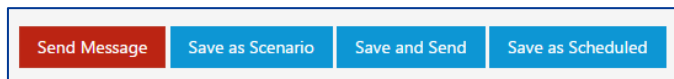

- Easily view alert features at any time, via the **Feature Summary** section on the right-hand sticky navigation bar, and access the tab to make changes by clicking on the *Edit* link.

Sender Information tab:

- Confirm/correct sender name and optional data, as long as sender data is not locked. If profile default values were defined, fields will be prepopulated.
- Easily view **Sender Information** at any time, via the right-hand sticky navigation bar, and access the tab to make changes by clicking on the *Edit* link.

Review *Message Summary* section on the right-hand sticky navigation bar.

- Check that the selected number of groups and recipients to receive the alert is correct.

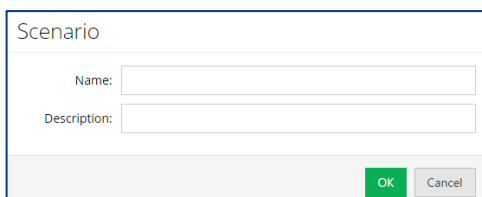

Send Message:

- Click on the red **Send Message** button to send out the alert. The **Message History** page automatically displays. Click on the alert (**Message** column) in order to drill down to the **Message Details** page.

Save as Scenario:

- Click on the **Save as Scenario** button to save the alert as a scenario.
- Enter scenario name and description and click **OK**.

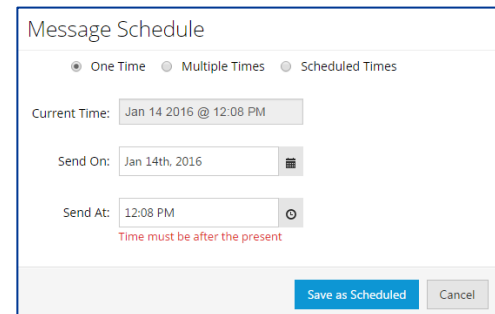

Save and Send: (Save as Scenario and Send Message)

- Click on the **Save and Send** button to save the alert as a scenario and send out the alert.
- After providing scenario name and description, the **Message History** page displays.

Save as Scheduled:

- Click on the **Save as Scheduled** button to save a scheduled alert.

CODE BLACK - BOMB THREAT QUESTIONS:

Please remain calm and attempt to get the answers to the following questions from the caller.

IMPORTANT NOTE: Do not hang up the telephone until they do.

Try to attract the attention of a colleague to call 911 and have the call traced.

1. When is the bomb going to explode?
2. Where is the bomb?
3. What kind of bomb is it?
4. What does it look like?
5. Why did you place a bomb in the Manor?
6. What group do you represent?
7. What is your name?

...

CODE BLACK

WHEN CALL IS COMPLETED, CALL 911!

Staff cover the exit doors to prevent anyone coming into the building until the building is declared safe by Police.

1. Time/Date call came in. How long did the call last:
3. Record any conversation try to write down the exact words:
4. Please describe the caller's tone of voice: Accent, slurred, speech, sound intoxicated?
5. Was the caller: male or female? Describe the caller's manner:
7. Was the voice familiar to you?
8. Does the caller seem familiar with the Manor?
9. Were there any background noises:
10. Any other comments/observations:

BOMB THREAT FORM

A Code Black is called when a home in LTCSS receives a bomb threat

DO NOT SAY BOMB OR BOMB THREAT – SAY “CODE BLACK” THREE TIMES

Person receiving the call should:

- ☐ Keep the caller on the line as long as possible (ask them to repeat the message or act like you are having trouble understanding them)
- ☐ Signal to a staff member to call 9-1-1 immediately
- ☐ Follow and complete the **Bomb Threat Form** provided at the end of this checklist
- ☐ Inform Charge Nurse/management immediately after the call
- ☐ Avoid alarming the residents

After the call, the Charge Nurse will:

- ☐ Designate a staff member to contact the Administrator/ADRC/DRC regarding the “**Code Black**”. Ensure the General Manager of HES is notified.
- ☐ Charge Nurse will announce “**Code Black**” three times over the messaging system
- ☐ Call 9-1-1 (if not already called)
- ☐ The Runner will escort emergency personnel to the *conference room*
- ☐ Police will conduct a search of the premises with the assistance of LTC staff

If you find a suspicious package:

- **DO NOT TOUCH** any items that seem out of place, have no purpose, are unlabeled or are not claimed by anybody
- Be aware of what items should and should not be there
- Ask nearby staff/visitors/residents if they know anything about the package
- Notify Charge Nurse of the suspicious package
- The Charge Nurse should ensure no one goes near the package, make every effort to find the owners of the package and ask it was left in error

CODE BROWN – HAZARDOUS MATERIAL SPILL INCIDENT REPORT

ES Supervisor: _____

Date of Spill: _____ Time: _____

Spill Reported By: _____ Area: _____

1. Did a worker cause the spill? If yes, what was the worker doing at the time of the spill?

Describe job activity _____

2. What is the name of the staff who caused the spill? Department? _____

3. What is the name of the chemical which was spilled? Was it a mercury release? (Be specific) _____

4. Where did the spill occur? _____

5. How was the spill caused? _____

6. Was any equipment/material involved?

Name of equipment/material _____

7. Was anyone injured? Did anyone inhale/ingest the chemical? Be specific?/

Who? _____

Explain _____

8. Were there any other factors which contributed to the spill?

9. Was anyone else totally or partially responsible for the spill?

Who? _____

Explain _____

10. Was misconduct involved in the spill?

☐ Yes

☐ No

If yes, explain:

11. Name witness(es) or person(s) have knowledge of the spill?

12. Name person(s)/staff who cleaned up the spill?

13. Detail how this person(s)/staff cleaned up of the spill?

(also complete and attach a copy of the Investigation Analysis)

HAZARDOUS SPILL INVESTIGATION ANALYSIS:

OBVIOUS CAUSES:

What were the obvious causes of this spill incident? What actions, inaction, circumstances or conditions contributed to this incident? (e.g. lack of knowledge or lack of procedure training, environmental factors, contravention of safety regulations and/or proper practices, human behavior or personal factors, proper personal protective equipment not used, etc.):

PRIMARY CAUSES:

Explain the reasons for the presence of the OBVIOUS CAUSES listed above. (e.g equipment design, inadequate supervision or training, inadequate maintenance or purchasing controls etc.):

Control Measures:

ACTION PLAN:

What specific steps can be taken to prevent a similar incident? (e.g. establish new procedure or policy, perform task analysis, improve preventative maintenance program, repair or replace equipment and materials, implement stronger training procedures, improve safeguards etc.)

Action To Be Taken:

Action To Be Taken By Whom and When:

FINANCIAL TRACKING OF EXTERNAL RESIDENT COSTS

COSTS INCURRED

Costs incurred by providing accommodation and care to evacuees may be charged-back to the facility being evacuated, at the discretion of the Administrator in consultation with the GM.

It is the intent of the County of Simcoe to recover costs incurred by responding to receiving evacuees from a communal living setting (e.g. long-term care facility, group home, etc.).

1. Department Supervisors monitor and document costs incurred related to staffing, supplies and equipment.
2. In consultation with the Administrator, Supervisors provide invoices to Finance to cover costs incurred to the facility where evacuation occurred.
3. In consultation with the Administrator, the Finance Department reconciles all charges and produces a detailed invoice of the costs incurred to the facility evacuated.
