Mr. John Daly, County Clerk
County of Simcoe Administration Centre
1110 Highway 26
Midhurst, ON
L9N 1X6

Dear Mr. Daly,

This letter is in reference to the ERRC project that the County of Simcoe is planning for the Freele Tract at 2976 Horseshoe Valley Road in Springwater Township.

We are a group of citizens whose homes are located past the proposed site on Rainbow Valley Road East and the adjoining Baseline Road, located at the north side of Site C-136, otherwise known as the Freele Tract.

As the County continues with its plans – something many of us never truly imagined would actually come to be, since none of us could fathom locating such a volatile facility within a forest – we must prepare for the safety of our families should this *high risk* facility become a reality in this vulnerable forest.

During a tour of the Guelph facility for near neighbours arranged through County staff, it was confirmed that fires are a common occurrence. In 2014, a facility smaller than the ERRC proposed for the Freele forest, located in Springwater Township, burned to the ground after a 16-hour battle that required the assistance of 75 fire fighters from neighbouring communities. This facility had safety precautions in place, including anti-fire devices, and as we understand, so will the ERRC. You should also note that not only was this facility located on an industrial site which was better suited to contain and control emergency situations such as this fire, but so too did it offer easier access to the facility when emergencies arose.

The proposed ERRC is slated for a natural corridor, fully surrounded by dense woodlands and nearby homes. An emergency access road from the facility is intended to enter from one of Springwater's many dead-end roads, Rainbow Valley Road East. Rainbow Valley Road and Baseline Road are narrow dirt and gravel roads that lead to a dead end, and that are in poor condition most of the year. In case of emergency, this is the only way for our families to reach our homes and it's the only way for our families to leave the area from our homes. In addition, our families *must* travel past the proposed ERRC site and its entrance onto Rainbow Valley Road if ever it became necessary to evacuate the area. The facility footprint is slated to be in closer proximity to Rainbow Valley Road than to Horseshoe Valley Road. A fire would only have to travel a very short distance north or northeast to reach Rainbow Valley Road. Should this road become unpassable due to fire, emergency vehicles, poor road conditions, or other related impediments, our families will become trapped in this dense forested area.

To date, we have been unable to locate any type of **Emergency Response Plan** that addresses evacuation routes for residents on neighbouring dead-end roads. Nor have we been able to locate anywhere in the County's plans any intentions to upgrade roads for better access to the neighbouring properties at risk.

Should a worst-case scenario occur with no proper emergency evacuation routes in place, the fate of our families and homes will be needlessly placed at *great* risk.

We implore County Council to reconsider this project for a site that is properly suited and set up for industrial use. We ask that Council NOT approve this Official Plan Amendment.

Should you have any questions for our families concerning the above, please do not hesitate to contact us.

Sincerely,

Cc: council@springwater.ca
