McCullough on March 24, 2016 indicating that meeting notes would be circulated shortly and that a Community Monitoring Committee would be at the direction of County Council  consultation methodology subsequently presented to County Council via Item CCW 16-191 - request for Community Monitoring Committee presented here - direction to continue consultation with 500 m landowners as a group at key milestones may reassess this direction upon commissioning of the facility  neighbouring landowner meeting notes circulated to 500 m landowners on March 31, 2016, provided to County Council via Item CCW 16-191 - Schedule 1, and posted on the project webpage	Consultation Report - Project Initiation and Siting (June 2018) - provides overview of consultation undertaken to date and methodology
Jerry & Sandi Dunlop		March 19, 2016	Rainbow Valley Road East	Springwater		e-mail to Warden (comment)	included in Item CCW 16-191 Schedule 4 - page 62	see e-mail dated March 19, 2016 - comment "no garbage in the forest no how no way"	preferred site	Acknowledged.	
The Spek family		March 1, 2016				e-mail sent from website	e-mail sent from SWM March 3, 2016	Thank you for the update. However I am somewhat confused as to how in a huge county like ours, five proposed sites all fall within one township - for this proposed project "Springwater". It is not logical not statistically possible. I carefully reviewed the background information provided at one of the public meetings and quickly came to the conclusion that it appeared that four out of the five potential sites had such serious environmental concerns they should never have been on the list in the first place. I wish to continue receiving updates. I know that there are many, many concerned taxpayers who will question this odd decision. Perhaps good opportunity for a "re-think" of the final candidate?	siting process "environmental concerns"	Conestoga-Rovers Part 1 siting reports include details on the siting methodology and evaluation criteria - including clarification on the center of waste generation and transportation efficiencies when considering siting of the MMF  siting process - FAQs - v1 - page 4 - 1 to 3	Amended Planning Justification Report - summary of siting process
Mr. John Kapteyn		March 2, 2016				e-mail sent to S. Mack	e-mail sent from SWM March 2, 2016	see e-mail dated March 2, 2016	OPF - end product uses	Conestoga-Rovers Part 1 report provides overview of end product quality - Appendix A - Organics Processing Overview, A.2 End-Product Quality  end products will be determined following procurement of organics processing technology  end products - FAQs - v1 - page 7 - 1
