										addressed in Part 3 Siting Report, technical studies, or FAQs (v1 - October 2016, v2 - January 2017)	Follow-up - addressed in technical studies undertaken at 2976 Horseshoe Valley Road West, Springwater (if applicable)
Ms. Maggie Curran		October 3, 2016				e-mail to Customer Service	-	Thank you. The best place to put the new facility is on Tiffin Street. There's lots of space available, roadways leading in every direction, close to 400 Highway and both railroads. Best reason of all, it will not impact the present use of that area, which is now used for recycling automobiles and other industrial businesses. If trucks are scheduled to run between the hours of 11 a.m. and 3 p.m. the impact on traffic will be minimal. The forest tract already there will buffer any noise from intruding on the new estate developments proposed for Ferndale and Ardagh.	opinion/comment on siting relocate in the City of Barrie	Acknowledged.	-
Ms. Barb Kutcher		October 7, 2016	Bridle Trail	Midhurst	L9X 0J9	letter received to Corporate Services	letter sent from J. Fairchild on October 26, 2016	I filled out the online questionnaire before the deadline. I wanted to add comments. I found the questionnaire difficult to understand, and not very straight forward. It was not user friendly. I also wanted to say, I feel the County should work with the City of Barrie and Orillia to find a suitable processing site. I feel Barrie is a better location for a processing site with a great transportation corridor. Has the County formalized a commitment with Barrie? Have they formally met and written up any agreement?	comment on the OPF Project Delivery Method Survey locate in the City of Barrie agreement with Barrie and Orillia?	Comment on the OPF Project Delivery Method Survey acknowledged. the Environmental Resource Recovery Centre will be designed to accommodate current County needs and future growth - in the interim, there would be potential capacity to accept some source-separated organics and recycling from other jurisdictions such as the separated cities of Barrie and Orillia noting that this would offset some of the County's costs in regard to transfer of blue box recycling, letters of intent have been received from the Cities of Barrie and Orillia confirming their intent to incorporate the County's proposed recycling transfer facility as an option for consideration in the procurement of their next collection and processing contract(s)	-
Mr. Gordon Grainger	Broadview Strategy Group Friends of Simcoe Forests	October 18, 2016 October 25, 2016 November 3, 2016				e-mail to Warden e-mail to Warden e-mail to Warden	letters sent from R. McCullough on October 28, 2016 (2) letter sent from R. McCullough on November 9, 2016 correspondence to Warden and responses included in Item CCW 17-038, Schedule 3 - pages 37 to 53	see e-mail dated October 18, 2016 see e-mail dated October 25, 2016 see e-mail dated November 3, 2016	comment/opinion on preferred site siting buffer distances forestry Planning studies approvals process costs traffic fire safety FSC designation	see letters of response from R. McCullough dated October 28 and November 9, 2016 - concerns noted by Mr. Grainger were addressed in this correspondence (including information on buffer distances) concerns noted were considered in a variety of technical studies undertaken at the preferred site and the business case reports for the OPF and MMF which were presented in fall 2017 - information also provided in the FAQs financial considerations - FAQs - v1 - page 8 and 9 traffic - FAQs - v1 - page 11 fire safety - FAQs - v2 - page 8 - 1	all technical studies undertaken to support the land use Planning process can be found on the County's Planning webpage, link provided at www.simcoe.ca/errc with site conditions understood, project costs were presented in business case reports for the OPF and MMF in fall 2017 - final business case for the OPF will be presented following the procurement process

McCullough on December 8, 2016 correspondence and response included in Item CCW 17-038, Schedule 3 - pages 25 to 28	see e-mail dated November 30, 2016	comment/opinion on preferred site wildlife groundwater, surface water fire traffic	Acknowledged. various concerns noted were considered in a variety of technical studies undertaken at the preferred site - information also provided in the FAQs natural heritage - FAQs - v1 - page 10 - 2 and 6 groundwater, management of water - FAQs - v1 - page 6 - 1, page 7 - 7 and 8 fire safety - FAQs - v2 - page 8 - 1 traffic - FAQs - v1 - page 11	all technical studies undertaken to support the land use Planning process can be found on the County's Planning webpage, link provided at www.simcoe.ca/errc Amended Scoped Environmental Impact Study - natural heritage features considered Updated Hydrogeological Assessment - consideration for groundwater and surface water Amended Facility Characteristics Report - detailed information in Section 4.4.1 on fire protection, details Project Team meeting with Township of Springwater Director of Fire & Emergency Services/ Fire Chief and Deputy Fire Chief on June 22, 2017 Traffic Impact Study and Traffic Impact Study Addendum - details on impact of traffic, recommended improvements
Mrs. Lynda Van Casteren		December 12, 2016	Horseshoe Valley Road West	Phelpston	L0L 2K0	e-mail sent to Customer Service	e-mail sent from Customer Service sent December 15, 2016 letter from Warden sent December 22, 2016	see e-mail dated December 12, 2016	concern over wording of the notification to the project contact list about the RFI for organics processing options "including development of an OPF at the County's Environmental Resource Recovery Centre, located 2976 Horseshoe Valley Road West, Springwater."	see letter of response from the Warden dated December 22, 2016 "Although we appreciate your feedback, it was clearly noted in the first statement of the e-mail that the ERRC project is under development. County Council direction on this is clear - work will continue on advancing both the Materials Management Facility (MMF) and Organics Processing Facility (OPF) projects at the ERRC site, located at 2976 Horseshoe Valley Road West, Springwater. Project development has been documented in previous correspondence to the contact list, in numerous Council reports, and on the posted Development Strategy (on the project webpage)."	-
Ms. Heather Rutherford		December 12, 2016	Flos Road Three East	Springwater		e-mail sent to Customer Service	e-mail sent from CS on December 15, 2016 letter sent from R. McCullough on December 16, 2016	see e-mail dated December 12, 2016	concern over wording of the notification to the project contact list about the RFI for organics processing options	see letter of response from R. McCullough dated December 16, 2016 "It is clearly noted in the first statement of our e-mail of December 9, 2016 that the ERRC project is under development. We assume that those receiving these e-mails have some knowledge of this project (i.e. they are following the projects progress) as they themselves have signed-up to receive updates. Since 2014, we have provided numerous e-mails on consultation and information sessions, staff reports, and procurement opportunities related to this project (over fifteen e-mails)."	-
Mr. Frank Gerrits		December 14, 2016				e-mail sent to Customer Service	e-mail sent from CS on December 15, 2016 letter sent from R. McCullough on December 16, 2016	see e-mail dated December 14, 2016	concern over wording of the notification to the project contact list about the RFI for organics processing options "including development of an OPF at the County's Environmental Resource Recovery Centre, located 2976 Horseshoe Valley Road West, Springwater."	see letter of response from R. McCullough dated December 16, 2016 "It is clearly noted in the first statement of our notification of December 9, 2016 e-mail that the ERRC project is under development - nowhere in this message did it state that this facility is already on the property". The purpose of this particular e-mail was merely to notify the contact list that the Request for Information (RFI) for organics management options had been posted - an RFI seeking all options for organics processing including development of a County OPF at 2976 Horseshoe Valley Road West and available merchant capacity at an alternate facility. This information will be used for the preliminary business case."	-
